Re: Property: 8629 Latimore Ln
Middleton, ID 83644
Borrower: Christopher Sutton
File No.: 2610-00030

Opinion of Value: $
Effective Date: 10/03/2026

In accordance with your request, we have appraised the above referenced property. The report of that appraisal is attached.

The purpose of the appraisal is to develop an opinion of market value for the property described in this appraisal report, as improved, in unencumbered fee simple title of ownership.

This report is based on a physical analysis of the site and improvements, a locational analysis of the neighborhood and city, and an economic analysis of the market for properties such ch as the subject. The appraisal was developed and the report was prepared in accordance with the Uniform Standards of Professional Appraisal Practice.

The opinion of value reported above is as of the stated effective date and is contingent upon the certification and limiting conditions attached.

It has been a pleasure to assist you. Please do not hesitate to contact me or any of my staff if we can be of additional service to you.

Sincerely,

Robert Yanzuk

APPRAISAL AND REPORT IDENTIFICATION

This Report is one of the following types:

☒ Appraisal Report (A written report prepared under Standards Rule 2-2(a) , pursuant to the Scope of Work, as disclosed elsewhere in this report.)

☐ Restricted Appraisal Report (A written report prepared under Standards Rule 2-2(b) , pursuant to the Scope of Work, as disclosed elsewhere in this report, restricted to the stated intended use only by the specified client and any other named intended user(s).)

Comments on Standards Rule 2-3

I certify that, to the best of my knowledge and belief:
- The statements of fact contained in this report are true and correct.
- The reported analyses, opinions, and conclusions are limited only by the reported assumptions and limiting conditions and are my personal, impartial, and unbiased professional analyses, opinions, and conclusions.
- Unless otherwise indicated, I have no present or prospective interest in the property that is the subject of this report and no personal interest with respect to the parties involved.
- Unless otherwise indicated, I have performed no services, as an appraiser or in any other capacity, regarding the property that is the subject of this report within the three-year period immediately preceding acceptance of this assignment.
- I have no bias with respect to the property that is the subject of this report or the parties involved with this assignment.
- My engagement in this assignment was not contingent upon developing or reporting predetermined results.
- My compensation for completing this assignment is not contingent upon the development or reporting of a predetermined value or direction in value that favors the cause of the client, the amount of the value opinion, the attainment of a stipulated result, or the occurrence of a subsequent event directly related to the intended use of this appraisal.
- My analyses, opinions, and conclusions were developed, and this report has been prepared, in conformity with the Uniform Standards of Professional Appraisal Practice that were in effect at the time this report was prepared.
- Unless otherwise indicated, I have made a personal inspection of the property that is the subject of this report.
- Unless otherwise indicated, no one provided significant real property appraisal assistance to the person(s) signing this certification (if there are exceptions, the name of each individual providing significant real property appraisal assistance is stated elsewhere in this report).

Reasonable Exposure Time

(USPAP defines Exposure Time as the estimated length of time that the property interest being appraised would have been offered on the market prior to the hypothetical consummation of a sale at market value on the effective date of the appraisal.)

My Opinion of Reasonable Exposure Time for the subject property at the market value stated in this report is: 0-60

Exposure time exposure time is the appraiser's opinion of the amount of time the subject property would have been offered on the market prior to the hypothetical consummation of a sale at market value on the effective date of the appraisal. The reasonable exposure time linked to this value opinion is 0-60 days.

Comments on Appraisal and Report Identification

Note any USPAP-related issues requiring disclosure and any state mandated requirements:

Additional certification

I have performed no services as an appraiser or in any other capacity regarding the property that is the subject of this appraisal within the three-year period immediately preceding acceptance of this assignment. I have no current or prospective interests in the subject property or the parties involved.

Scope of work inspection

The appraiser made an interior and exterior inspection of all readily accessible areas of the subject property improvements. The appraiser has noted all readily observable conditions of the subject property, that is, conditions that are immediately noticeable and discernible during a typical site visit. The appraiser is not a home inspector, and this appraisal report is not a home inspection; the appraiser only performed a visual observation of accessible areas and the appraisal report cannot be relied upon to disclose conditions and/or defects in the property.

FIRREA certification statement: the appraiser certifies and agrees that this appraisal was prepared in accordance with the requirements of title xi of the financial institutions, reform, recovery, and enforcement act (FIRREA) of 1989, as amended (12 u.s.c. 3331 et seq.), and any applicable implementing regulations in effect at the time the appraiser signs the appraisal certification.

Describe common elements and recreational facilities.

Form 1004UAD - "TOTAL" appraisal software by a la mode, inc. - 1-800-ALAMODE

This report form is designed to report an appraisal of a one-unit property or a one-unit property with an accessory unit; including a unit in a planned unit development (PUD). This report form is not designed to report an appraisal of a manufactured home or a unit in a condominium or cooperative project.

This appraisal report is subject to the following scope of work, intended use, intended user, definition of market value, statement of assumptions and limiting conditions, and certifications. Modifications, additions, or deletions to the intended use, intended user, definition of market value, or assumptions and limiting conditions are not permitted. The appraiser may expand the scope of work to include any additional research or analysis necessary based on the complexity of this appraisal assignment. Modifications or deletions to the certifications are also not permitted. However, additional certifications that do not constitute material alterations to this appraisal report, such as those required by law or those related to the appraiser's continuing education or membership in an appraisal organization, are permitted.

SCOPE OF WORK: The scope of work for this appraisal is defined by the complexity of this appraisal assignment and the reporting requirements of this appraisal report form, including the following definition of market value, statement of assumptions and limiting conditions, and certifications. The appraiser must, at a minimum: (1) perform a complete visual inspection of the interior and exterior areas of the subject property, (2) inspect the neighborhood, (3) inspect each of the comparable sales from at least the street, (4) research, verify, and analyze data from reliable public and/or private sources, and (5) report his or her analysis, opinions, and conclusions in this appraisal report.

INTENDED USE: The intended use of this appraisal report is for the lender/client to evaluate the property that is the subject of this appraisal for a mortgage finance transaction.

INTENDED USER: The intended user of this appraisal report is the lender/client.

DEFINITION OF MARKET VALUE: The most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller, each acting prudently, knowledgeably and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby: (1) buyer and seller are typically motivated; (2) both parties are well informed or well advised, and each acting in what he or she considers his or her own best interest; (3) a reasonable time is allowed for exposure in the open market; (4) payment is made in terms of cash in U. S. dollars or in terms of financial arrangements comparable thereto; and (5) the price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions* granted by anyone associated with the sale.

*Adjustments to the comparables must be made for special or creative financing or sales concessions. No adjustments are necessary for those costs which are normally paid by sellers as a result of tradition or law in a market area; these costs are readily identifiable since the seller pays these costs in virtually all sales transactions. Special or creative financing adjustments can be made to the comparable property by comparisons to financing terms offered by a third party institutional lender that is not already involved in the property or transaction. Any adjustment should not be calculated on a mechanical dollar for dollar cost of the financing or concession but the dollar amount of any adjustment should approximate the market's reaction to the financing or concessions based on the appraiser's judgment.

STATEMENT OF ASSUMPTIONS AND LIMITING CONDITIONS: The appraiser's certification in this report is subject to the following assumptions and limiting conditions:

1. The appraiser will not be responsible for matters of a legal nature that affect either the property being appraised or the title to it, except for information that he or she became aware of during the research involved in performing this appraisal. The appraiser assumes that the title is good and marketable and will not render any opinions about the title.

2. The appraiser has provided a sketch in this appraisal report to show the approximate dimensions of the improvements. The sketch is included only to assist the reader in visualizing the property and understanding the appraiser's determination of its size.

3. The appraiser has examined the available flood maps that are provided by the Federal Emergency Management Agency (or other data sources) and has noted in this appraisal report whether any portion of the subject site is located in an identified Special Flood Hazard Area. Because the appraiser is not a surveyor, he or she makes no guarantees, express or implied, regarding this determination.

4. The appraiser will not give testimony or appear in court because he or she made an appraisal of the property in question, unless specific arrangements to do so have been made beforehand, or as otherwise required by law.

5. The appraiser has noted in this appraisal report any adverse conditions (such as needed repairs, deterioration, the presence of hazardous wastes, toxic substances, etc.) observed during the inspection of the subject property or that he or she became aware of during the research involved in performing the appraisal. Unless otherwise stated in this appraisal report, the appraiser has no knowledge of any hidden or unapparent physical deficiencies or adverse conditions of the property (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) that would make the property less valuable, and has assumed that there are no such conditions and makes no guarantees or warranties, express or implied. The appraiser will not be responsible for any such conditions that do exist or for any engineering or testing that might be required to discover whether such conditions exist. Because the appraiser is not an expert in the field of environmental hazards, this appraisal report must not be considered as an environmental assessment of the property.

6. The appraiser has based his or her appraisal report and valuation conclusion for an appraisal that is subject to satisfactory completion, repairs, or alterations on the assumption that the completion, repairs, or alterations of the subject property will be performed in a professional manner.

APPRAISER'S CERTIFICATION: The Appraiser certifies and agrees that:

1. I have, at a minimum, developed and reported this appraisal in accordance with the scope of work requirements stated in this appraisal report.

2. I performed a complete visual inspection of the interior and exterior areas of the subject property. I reported the condition of the improvements in factual, specific terms. I identified and reported the physical deficiencies that could affect the livability, soundness, or structural integrity of the property.

3. I performed this appraisal in accordance with the requirements of the Uniform Standards of Professional Appraisal Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and that were in place at the time this appraisal report was prepared.

4. I developed my opinion of the market value of the real property that is the subject of this report based on the sales comparison approach to value. I have adequate comparable market data to develop a reliable sales comparison approach for this appraisal assignment. I further certify that I considered the cost and income approaches to value but did not develop them, unless otherwise indicated in this report.

5. I researched, verified, analyzed, and reported on any current agreement for sale for the subject property, any offering for sale of the subject property in the twelve months prior to the effective date of this appraisal, and the prior sales of the subject property for a minimum of three years prior to the effective date of this appraisal, unless otherwise indicated in this report.

6. I researched, verified, analyzed, and reported on the prior sales of the comparable sales for a minimum of one year prior to the date of sale of the comparable sale, unless otherwise indicated in this report.

7. I selected and used comparable sales that are locationally, physically, and functionally the most similar to the subject property.

8. I have not used comparable sales that were the result of combining a land sale with the contract purchase price of a home that has been built or will be built on the land.

9. I have reported adjustments to the comparable sales that reflect the market's reaction to the differences between the subject property and the comparable sales.

10. I verified, from a disinterested source, all information in this report that was provided by parties who have a financial interest in the sale or financing of the subject property.

11. I have knowledge and experience in appraising this type of property in this market area.

12. I am aware of, and have access to, the necessary and appropriate public and private data sources, such as multiple listing services, tax assessment records, public land records and other such data sources for the area in which the property is located.

13. I obtained the information, estimates, and opinions furnished by other parties and expressed in this appraisal report from reliable sources that I believe to be true and correct.

14. I have taken into consideration the factors that have an impact on value with respect to the subject neighborhood, subject property, and the proximity of the subject property to adverse influences in the development of my opinion of market value. I have noted in this appraisal report any adverse conditions (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) observed during the inspection of the subject property or that I became aware of during the research involved in performing this appraisal. I have considered these adverse conditions in my analysis of the property value, and have reported on the effect of the conditions on the value and marketability of the subject property.

15. I have not knowingly withheld any significant information from this appraisal report and, to the best of my knowledge, all statements and information in this appraisal report are true and correct.

16. I stated in this appraisal report my own personal, unbiased, and professional analysis, opinions, and conclusions, which are subject only to the assumptions and limiting conditions in this appraisal report.

17. I have no present or prospective interest in the property that is the subject of this report, and I have no present or prospective personal interest or bias with respect to the participants in the transaction. I did not base, either partially or completely, my analysis and/or opinion of market value in this appraisal report on the race, color, religion, sex, age, marital status, handicap, familial status, or national origin of either the prospective owners or occupants of the subject property or of the present owners or occupants of the properties in the vicinity of the subject property or on any other basis prohibited by law.

18. My employment and/or compensation for performing this appraisal or any future or anticipated appraisals was not conditioned on any agreement or understanding, written or otherwise, that I would report (or present analysis supporting) a predetermined specific value, a predetermined minimum value, a range or direction in value, a value that favors the cause of any party, or the attainment of a specific result or occurrence of a specific subsequent event (such as approval of a pending mortgage loan application).

19. I personally prepared all conclusions and opinions about the real estate that were set forth in this appraisal report. If I relied on significant real property appraisal assistance from any individual or individuals in the performance of this appraisal or the preparation of this appraisal report, I have named such individual(s) and disclosed the specific tasks performed in this appraisal report. I certify that any individual so named is qualified to perform the tasks. I have not authorized anyone to make a change to any item in this appraisal report; therefore, any change made to this appraisal is unauthorized and I will take no responsibility for it.

20. I identified the lender/client in this appraisal report who is the individual, organization, or agent for the organization that ordered and will receive this appraisal report.

21. The lender/client may disclose or distribute this appraisal report to: the borrower; another lender at the request of the borrower; the mortgagee or its successors and assigns; mortgage insurers; government sponsored enterprises; other secondary market participants; data collection or reporting services; professional appraisal organizations; any department, agency, or instrumentality of the United States; and any state, the District of Columbia, or other jurisdictions; without having to obtain the appraiser's or supervisory appraiser's (if applicable) consent. Such consent must be obtained before this appraisal report may be disclosed or distributed to any other party (including, but not limited to, the public through advertising, public relations, news, sales, or other media).

22. I am aware that any disclosure or distribution of this appraisal report by me or the lender/client may be subject to certain laws and regulations. Further, I am also subject to the provisions of the Uniform Standards of Professional Appraisal Practice that pertain to disclosure or distribution by me.

23. The borrower, another lender at the request of the borrower, the mortgagee or its successors and assigns, mortgage insurers, government sponsored enterprises, and other secondary market participants may rely on this appraisal report as part of any mortgage finance transaction that involves any one or more of these parties.

24. If this appraisal report was transmitted as an "electronic record" containing my "electronic signature," as those terms are defined in applicable federal and/or state laws (excluding audio and video recordings), or a facsimile transmission of this appraisal report containing a copy or representation of my signature, the appraisal report shall be as effective, enforceable and valid as if a paper version of this appraisal report were delivered containing my original hand written signature.

25. Any intentional or negligent misrepresentation(s) contained in this appraisal report may result in civil liability and/or criminal penalties including, but not limited to, fine or imprisonment or both under the provisions of Title 18, United States Code, Section 1001, et seq., or similar state laws.

SUPERVISORY APPRAISER'S CERTIFICATION: The Supervisory Appraiser certifies and agrees that:

1. I directly supervised the appraiser for this appraisal assignment, have read the appraisal report, and agree with the appraiser's analysis, opinions, statements, conclusions, and the appraiser's certification.

2. I accept full responsibility for the contents of this appraisal report including, but not limited to, the appraiser's analysis, opinions, statements, conclusions, and the appraiser's certification.

3. The appraiser identified in this appraisal report is either a sub-contractor or an employee of the supervisory appraiser (or the appraisal firm), is qualified to perform this appraisal, and is acceptable to perform this appraisal under the applicable state law.

4. This appraisal report complies with the Uniform Standards of Professional Appraisal Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and that were in place at the time this appraisal report was prepared.

5. If this appraisal report was transmitted as an "electronic record" containing my "electronic signature," as those terms are defined in applicable federal and/or state laws (excluding audio and video recordings), or a facsimile transmission of this appraisal report containing a copy or representation of my signature, the appraisal report shall be as effective, enforceable and valid as if a paper version of this appraisal report were delivered containing my original hand written signature.

Lender/Client	Deephaven Mortgage LLC						

Effective April 1, 2022, Fannie Mae and Freddie Mac are requiring all appraisal reports to be prepared using ANSI measuring guidelines. The sketch included herein is based on measurements taken in accordance with these guidelines. The dimensions were measured and reported to the nearest inch.

The appraiser has confidential obligations that do not extend to the borrower or any other person/persons who have access to the appraisal report other than the stated client. This would include, but is not limited to, the borrowers, listing agents, selling agents, title person/persons, etc. All questions, concerns, or statements about the appraisal report MUST be communicated through the client. Contact made to the appraiser by anyone other than the client will be taken by the appraiser in an attempt to influence the appraiser and the opinion of value. The appraiser welcomes any additional information about the property, market data, and or questions not understood or answered in the appraisal report and is open to reviewing any additional information provided. However, all communication must go through the client.

Additional certification:

I have not performed services as an appraiser, or in any other capacity, regarding the property subject of this appraisal within the three-year period immediately preceding acceptance of this assignment.

To the best of my knowledge and beliefs, the statements of fact contained in this report are true and correct.

The report analysis, opinion, and conclusions are limited only by the reported assumptions and limiting conditions and are my personal impartial and unbiased professional analysis, opinion, and conclusions. I have no current or prospective interests in the subject property, or the parties involved.

Intended User:

This appraisal report is intended for us by the lender/client.

No additional intended users or uses are identified by the appraiser.

The appraiser has confidential obligations that do not extend to the borrower or any other person/persons who have access to the appraisal report other than the stated client. This would include, but is not limited to, the borrowers, listing agents, selling agents, title person/persons, etc. All questions, concerns, or statements about the appraisal report MUST be communicated through the client. Contact made to the appraiser by anyone other than the client will be taken by the appraiser in an attempt to influence the appraiser and the opinion of value. The appraiser welcomes any additional information about the property, market data, and or questions not understood or answered in the appraisal report and is open to reviewing any additional information provided. However, all communication must go through the client.

Intended Use:

The intended use is to evaluate the property that is the subject of this appraisal for a mortgage finance transaction, subject to the stated scope of work, purpose of the appraisal, reporting requirements of this appraisal report form, and definition of market value.

No additional intended users or uses are identified by the appraiser.

Scope of work inspection:

As part of the Scope of Work, the appraisal report was developed by gathering information on the subject property from the public records, the Alamode software program, and the Multiple Listing Service (IMLS). This includes the legal description, owner of record, and sales of the subject property within the past three years and current or past listings within the past 12 months. The appraisal report sets forth a sales summary in relation to comparability to the subject property and the appraiser's conclusion. Supporting documentation is retained in the appraiser's work file or located in the appraiser's office.

Upon receiving the assignment, the appraiser identified the real property being appraised and collected property-specific data available through public records, various data services, and/or the IMLS database when applicable. The appraiser completed an interior and exterior subject property inspection and noted the condition, quality, utility, amenities, and architectural style.

Zoning data was obtained from public records, office files, and or city/county planning offices. The collected data was used to develop a subject property profile and to perform a market search for similar closed comparable sales, pending sales and active listings. The sales were inspected from the street and photos were taken. The sales were confirmed and verified from public records, various data services, IMLS, and, when necessary, with an agent or the owner. The sales data was then analyzed and a value conclusion derived. The appraisal report was completed, signed, and released to the client. The appraisal report is intended to satisfy the requirements of USPAP.

Private Well:

It is noted the subject property has a private water supply.

Public water supply is not available or in close proximity at this time. It is not likely the subject property will be connected to public services in the near future given the location and lack of public services in the area.

Private Septic Systems:

It is noted the subject property has a private septic system.

Public sewer systems are not available or in close proximity at this time. It is not likely the subject property will be connected to public services in the near future given the location and lack of public services in the area.

The appraiser did not observe any septic system seepage but is not expert in this area.

The appraiser will not and cannot verify if the well and septic is in good working condition as they are not experts in this field. If the lender requires the well and septic be certified in good working order, or to their specific condition, then the appraiser recommends subject matter experts be brought in to verify the systems.

The appraiser made the extraordinary assumption that the subject property has a legal septic/well system and the septic/well meets all current state and local building codes and regulations. If this is found to be erroneous, the appraiser reserves the right to amend the report and its findings.

Well and septic systems are typical for the area and do not impact the subjects marketability or value estimate.

FIRREA Certification Statement:

General Text Addendum

File No. 2610-00030

Borrower	Christopher Sutton						
Property Address	8629 Latimore Ln						
City	Middleton	County	Canyon	State	ID	Zip Code	83644
Lender/Client	Deephaven Mortgage LLC						

The appraisal was prepared in accordance with the requirements of the Uniform Standards of Professional Appraisal Practice and in accordance with the requirements of Title XI of the Financial Institutions Reform, Recovery and Enforcement Act of 1989, as amended (12 U.S.C. 3331 et seq.), and any applicable implementing regulations in effect at the time the appraiser signs the appraisal certification. Compliance to the FIRREA Title XI has been met to the extent such supervision is mandated by the required assignment condition of other secondary lending agencies. In all other areas, given the nature of the assignment, the appraiser has adhered to the required assignment conditions of the secondary agencies. When identified by the appraiser and directed by the engagement of the client, the appraiser will adhere to those specific residential assignment condition, i.e. Fannie Mae, FHA, Freddie Mac, VA or Sallie Mae depending upon the specific assignment conditions. It is understood this adherence will be in keeping with the QM of the Safe Harbor Act as well as the Rebuttable Presumption of the FHA in FHA assignments. I further attest that on the effective date of the appraisal and the date of the report, I am a certified appraiser in the state for which the subject of the appraisal is located.

Exposure time:

Exposure time is deemed to expire as of the effective date of the appraisal. It examines the time frame leading up to the date of valuation, linking the value estimate to how long the property would have required exposure in order to sell at the estimated market value. Exposure time is the appraiser's opinion of the amount of time the subject property would have been offered on the market prior to the hypothetical consummation of a sale at market value on the effective date of the appraisal.

The reasonable exposure time linked to this value opinion is 0-60 days.

Market value:

The definition of market value is the most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller, each acting prudently, knowledgeably and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified day and the passing of title from a seller to buyer under conditions whereby: (1) buyer and seller are typically motivated; (2) both parties are well informed or well advised, and each acting in what he or she considers his or her own best interest: (3) payment is made in terms of cash in U.S. dollars or in terms of financial arrangements comparable thereto; and (5) the price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions granted by anyone associated with the sale.

Neighborhood - description:

The subject property is located 2-4 miles of downtown Middleton, 10-12 miles to Northwest Nazarene University and 25-30 miles to the Boise airport. The neighborhood is located within 2-6 miles of all public schools. Shopping is located within 2-4 miles and major shopping be located in downtown in downtown Nampa located 6-8 miles.

Neighborhood - market conditions:

The first market analysis was conducted using single family homes similar to the subject property and located within the marketing area of Middleton. This included properties listed and sold, as well as currently listed properties, in the past 12 months. Search criteria used to locate the sales and listings included: properties that were located on .50 up to 1.50 acres of land, homes with sqft. from 2500 up to 4800 sqft, homes built between 2005 up to 2025, with no restrictions on levels.

Conventional financing is typically for the area; with buyers and sellers usually paying their own closing costs. Sales prices within the area have been stable over the past 12 months. Current list to sales prices over the past 12 months has been ranging from 0% to -4% typically depending on the location of the properties, list prices, and amenities. There is a noted increase in FHA, VA and IHA transactions within the marketing area over the past 6-12 months with buyers and sellers typically paying their own closing costs. If seller concessions are noted they typically range between 1-2 points. Well priced homes sell within a reasonable time frame as noted by a neighborhood marketing study.

The average list to sales prices over the past 12 months range from -1% to -1% with the median list to sales prices ranging in the -2% to -2% range. Variants can occur when higher valued homes reduce their list prices greater than the lower valued homes.

Single Family Housing Trends -Property Specific

We first used a 12-month marketing time to obtain the total number of sales of as "similar properties to the subject property" within the subject marketing area. We then located all short sales properties, foreclosure properties and REO properties within the total number of closed sales. Taking the total number of distressed sales and dividing that number by the total number of sales gave us the percentage of distressed sales within the subjects marketing area. The following is a break down of this formula.

Single family homes housing trends - marketing time (days on market)

Using the above stated subject property analysis for the marketing area, the average days on the market for properties listed and sold within the past 6 months were days. Sales and listing information were obtained utilizing the IMLS

The market analysis was completed utilizing the IMLS.

The second marketing analysis was conducted using all single family properties located within the marketing area Middleton.

Conventional financing is typically for the area; with buyers and sellers usually paying their own closing costs. Sales prices within the area have been stable over the past 12 months. Current list to sales prices over the past 12 months has been ranging from 14% to -10% typically depending on the location of the properties, list prices, and amenities. There is a noted increase in FHA, VA and IHA transactions within the marketing area over the past 6-12 months with buyers and sellers typically paying their own closing costs. If seller concessions are noted they typically range between 1-2 points. Well priced homes sell within a reasonable time frame as noted by a neighborhood marketing study.

The average list to sales prices over the past 12 months are ranging from 0% to -1% with the median list to sales prices ranging in the 0% to -1% range. Variants can occur when higher valued homes reduce their list prices greater than the lower valued homes.

Median comparable list price	$0	$0	$561,995
Median comparable listings day on market	0	0	39

One unit housing trends - marketing time (days on market)

Using the above-stated market analysis for the subject property marketing area, the average days on market for properties listed and sold within the past 12 months was 25-31 days. Sales and listing information were obtained utilizing the IMLS.

General Text Addendum

File No. 2610-00030

Borrower	Christopher Sutton						
Property Address	8629 Latimore Ln						
City	Middleton	County	Canyon	State	ID	Zip Code	83644
Lender/Client	Deephaven Mortgage LLC						

Improvements - additional features:

The subject property includes but is not limited to the following items: covered porch, covered patio, landscaping, fencing, solid surface counter tops, custom wood work and attached 3 car garage.

Disclosure:

The state of Idaho is a non-disclosure state. The amount of a sale is not required to be reported to any public agency and is generally unavailable within the county records. The appraiser has endeavored to discover the true conditions of the factors and information of the comparative sales information and has designated the sources of the information provided within the report. The reader of this information should consider the source, or sources, as the information may vary from lack of an official central data source or reporting agency.

Time:

Statistical information about days on market information gathered through sales verification and interviews of market participants. Market value is based on reasonable exposure time.

Marketing time:

Is deemed to start at the effective date of the appraisal, looking forward in time. It is a prediction of how long a property would require exposure to a competitive and open market in order to find a buyer under either typical or prescribed circumstances.

Expanded scope of work statement - UAD limitations (uniform appraisal dataset)

At the request of the client, this appraisal report has been prepared in compliance with the UAD from Fannie Mae and Freddie Mac. The UAD requires the appraiser to use standardized responses that include specific formats, definitions, abbreviations, and acronyms. The appraiser attempted to obtain an adequate amount of information in the normal course of business regarding the subject and comparable properties.

Addresses:

The address reported on the appraisal form is according to us postal service records as required by UAD format. The title company reports the city or county address, and the title report may or may not match USPS records.

Condition:

The form mechanics and the limitations inherent in selecting a preordained condition (by virtue of a drop down menu selection process) creates criteria selections that may or may not be accurate and may create a conflict in information.

Some of the standardized responses required by the UAD, especially those in which the appraiser has not had the opportunity to verify personally or measure, could mistakenly imply greater precision and reliability in the data than is factually correct or typical in the normal course of business. Examples include condition, quality ratings, comparable sales and listing data. the appraiser makes no guarantees, express or implied, regarding building materials, their fitness, quality, condition or remaining economic life. Not every element of the subject property is viewable. The appraiser did not move any personal property, due to liability concerns for potential damage to the property, to disclose or reveal any unapparent or hidden defects to the structure, nor did the appraiser dismantle or probe the structure to observe enclosed, encased, or otherwise concealed areas. comparable data was generally obtained from third-party sources including but not limited to the local IMLS, county assessor, township assessor, online resources and additional public data sources. consequently, this information should be considered an "estimate" unless otherwise noted by the appraiser.

Support and rationale for highest and best analysis:

Highest and best use definition: The reasonably probable and legal use of the property, which is physically possible, appropriately supported, financially feasible, and that results in the highest value.

The subject property's highest and best use was developed by an analysis of the property as a vacant site, as well as, analysis as presently improved. In order to factor the contributory value, if any of the existing improvements. The analysis relied on the economic principle of consistent use, which requires that land and improvements be appraised on the same economically consistent use basis, and the economic principle of anticipation, which assumes that a property has value based anticipated future benefits from its expected use and not just it's present use by a buyer with full knowledge of all the uses and proposed uses that comprise the property.

The four tests of highest and best use are: (1) legally permissible (2) physically possible (3) financially feasible and (4) most profitable. The first two tests are interchangeable in order and, in many circumstances, the last two are combined. Steps Three and Four (financially feasible/most profitable) cannot be determined until the first two steps are analyzed.

The subject is legally permissible use based on its current zoning. Also, the lot size, shape and land-to-building ratio allow the present structure and indicate a good utilization of the improvements. Based on current market conditions, the existing structure as a single-family residence is its financially feasible and maximally productive use. The highest and best use, if vacant, would be to construct a single-family residence. The present improvements on the property are consistent with and contribute to its highest and best use.

Extraordinary assumptions:

The Uniform Standards of Professional Appraisal Practice (USPAP) defines an extraordinary assumption as: "*An assumption, directly related to a specific assignment, as of the effective date of the appraisal results, which, if found to be false, could alter the appraiser's opinions or conclusions.*" In essence, an extraordinary assumption is what you assume to exist. Extraordinary assumptions can be based on a number of factors or conditions, including:

Example-an appraiser can make the extraordinary assumption that the cost to cure the subject's deferred maintenance is based on reliable sources and if not, then any change may influence the final value determined.

Extraordinary assumptions are made in this report that the subject property has no easements, encroachments or liens that would affect the subjects marketability and that the subject has fee simple ownership.

Assumptions & Limited Conditions

The appraiser will not be responsible for matters of a legal nature that affect either the property being appraised or the title to it. The appraiser assumes that the title is good and marketable and, therefore, will not render any opinions about the title. The property is appraised on the basis of it being under responsible ownership.

Hypothetical Condition:

The Uniform Standards of Professional Appraisal Practice (USPAP) defines a hypothetical condition as: "*A condition, directly related to a*

specific assignment, which is contrary to what is known by the appraiser to exist on the effective date of the assignment results but is used for the purpose of analysis." In essence, a Hypothetical Condition is something contrary to what exists as of the effective date of value.

Example-) Appraising a proposed property (such as a house) while the property is currently a vacant lot. In this case, you will be making a hypothetical condition that the non-existent improvements actually exist as of a current date and not the expected completion date, which is referred to as a prospective date. When appraising a proposed house for lending purposes, the Fannie Mae Form 1004 states that you are using the hypothetical condition that the subject improvements are completed as of the effective (current) date of appraisal. The hypothetical condition is that the improvements do not exist or are under construction and your valuation is based on the completion of the improvements.

Market conditions addendum to the appraisal report : seller concessions for the past 12 months

Conventional financing is typically for the area with buyers and sellers paying their own closing costs. Sales prices within the area have been stable over the past 12 months. New home construction has increased within the area recently. There is a noted increase in FHA, VA and IHA financing transaction within the marketing area over the past 12 months. If seller concession are noted they typically range between 1-2 points. Well priced homes within the market typically sell within the reasonable time frame as noted by the neighborhood market analysis and the defined marketing area.

Market conditions addendum to the appraisal report : foreclosure/reo sales in the market

Short sale / foreclosure / reo properties - The appraiser has reviewed closed sales over the past 12 months as well as current available listings within the subjects marketing area. The analysis indicated that approx.48 closed sales over the past 12 month of which 0 were found to be short sale / foreclosure / reo properties. This equates to approx. 0% of all sales thus short sale / foreclosure / reo properties or listing may have been included in the report. The presence of these properties do tend to put downward pressure on the market and extending marketing times.

Crossing boundaries:

Some of the sales or listings used in the analysis are located across man made boundaries (major roadways, railroad tracks, golf course, etc.) or natural boundaries (rivers, lakes, vacant land, etc.). This could not be avoided, nor do they affect the sale or listings as being similar comparable properties to that of the subject property. There is no effect on the subjects estimated value or marketability and no adjustment for crossing boundaries are noted at this time.

Shared Driveway

The subject property appears to share a driveway or access road with contiguous properties. The appraiser could not locate a written easement or agreement on who maintains the roadway or who can deny access.

The appraiser made the extraordinary assumption subject property accessibility on the shared driveway is satisfactory and a written access or maintenance agreement is in place.

Comps over 6 months:
Some of the sales used in the analysis are over 6 months old as of the appraisal effective date. This was unavoidable at this time given the lack of similar sales or listings, however given the current marketing conditions time adjustments were not needed or made. Given the current and past 6–12-month marketing condition the older sales were still a good indicator of the subject property's current value estimate.

Comps over 1 mile:

Some sales used in the analysis are located over 1 mile from the subject site. Given the subject's location and the attempt to provide similar sales with similar age, land size, gla, and amenities this was unavoidable. The comparable sales that were located over 1 mile were still located in a very similar area to the subject property and were a good indicator of the subject's current value estimate.

Room counts:

No adjustments were made for the differences in bedroom counts but for only the differences in the total gla of the subject to that of the sales and listings used in the analysis. This was due to the fact that the sales comparable interiors were not inspected and we are reliant on the real estate agents to state the room counts correctly. Agents typically do not state the room counts correctly and one agent will call a room a bedroom when it's not and another agent will not call a bedroom a bedroom but an office or study depending on how they wish to market the property. With one source of sales data this unavoidable and again on adjustments were made for bedroom counts.

Agricultural use:

The subject property is located on 1.00 acres. At the time of the inspection, the appraiser did not determine the subject site was used for agricultural purposes. The size of the parcel is typical for the area and is used for "hobby farms" or personal uses only.

Land use:

On page one of the report under present land use, the "other" section states 35%. This is due to the subject property location in an area with large sections of vacant land. The estimated percentage for "other" is for the vacant land in the subjects marketing area. There are new developments being constructed as well as some limited new commercial developments in the area which will continue to change the estimate.

Utilities:

All the utilities, including water, power, gas (if present) were working at the time of the inspection.

Site value:

The site value is over 30% of the total estimate of value for the subject property. This is due to the fact the subject property is located in an area that has seen an substantial amount of growth over the past 10 years. The growth has increased vacant land prices. With an older home with smaller gla the land value is going to exceed this range and cannot be avoided. This is typical of homes of this age and total gla in the marketing area.

Sales concessions:

Some of the sales used in the analysis have sales concessions. Adjustments for the sales concessions were only made if the sales price was increased due to the sales concessions. The adjustment is the difference in final sales price to the listing price within the amount of the sales concession or what the market would deem to be reasonable. If the sales price was not increased, and the seller was willing to take a discount on the property to secure the sale, then no adjustments were made.

Predominate value- higher:

The estimated subject property value is higher than the predominate marketing area value. This is due to the fact that within the subjects

marketing area there are a number of large subdivision tracts that contain smaller track style homes that sell for far less then homes similar to the subject property. Although there are a number of similar developments to that of the subject property within the marketing area, the smaller tract homes sell more often and thus bringing down the predominate value for the subjects marketing area overall. The subject property is not considered to be an over improvement as there are a number of similar properties within the marketing area.

Sales 90 days:

Every attempt was made to provide sales within the past 90 days. Given the subjects' location, land size, age, gla this could not be done. The sales provided were the most current and similar to the subject at this time. Given the current market conditions, no time adjustment was made or needed. This adjustment was based on the percentage of increase per month then applied from the contract date of the sales used.

Range of listing and sales prices on 1004mc and URAR:

Given the lack of sales or listings in the area, the range of the high to low sales prices and listings prices are larger than typical range. Every attempt was made to locate sales and listings that were as similar to the subject as possible to demonstrate within the report the range of high to low listings and sales. To gather enough sales data to complete the analysis, a larger range was unavoidable.

Reconciliation and final value conclusion:

The only approach to value considered applicable to this assignment is the Sales Comparison Approach.

The Cost Approach would only be applicable if the structure was proposed, under construction or relatively new. As the house was originally constructed in 2020, the estimated depreciation of the improvements would be too subjective and therefore not considered a reliable approach to value.

The Income Approach typically utilizes sales that were also rented to establish a gross rent multiplier, which would be utilized with the estimated market rent of the subject. Due to no comparable sales that were also rented, the Income Approach to value was not applicable since a Gross Rent Multiplier cannot be established.

In the Sales Comparison Approach, closed sales were utilized in comparison to the subject property. This would include sales outside of the subject neighborhood if deemed necessary. Adjustments were made for any significant differences between the comparable sales and subject. Information on the comparable sales was based on a cross section of the public records, Alamode software program, Multiple Listing Service (IMLS), an exterior observation from the street and if possible, verification with the listing agent or other parties to the sale. The gross living area for the subject was based on measurements by the appraiser and the gross living area for the sales and listings comparable properties was obtained from IMLS and or county records.

Land value reconciliation:

Land value was estimated by using land sales within the subject's marketing area that have closed over the past 12 months. There was a total of 10 sales of vacant parcels of land within the subject's marketing area that ranged from 1.00 acres up to 3.15 acres. The sales prices ranged from $170,000 up to $400,000. We have estimated the subject site at $235,000 based on sales of similar size, utility, and location of that of the subject's parcel. The sales are located in similar developments with similar amenities as well as being located in similar zoning areas.

Summary of sales comparison approach

All sales were taken from within the subject marketing area and have closed and recorded within the past 12 months. All sales are located within 5 miles of the subject property. The sales and listings used in the analysis were the most similar and current to the subject that could be located at this time. All sales have similar access to public services, shopping and schools. All sales were similar in design, appeal and quality of construction.

There were a total of 48 sales and 12 listings that were reported on top of page 2 of the URAR within the subjects marketing area that were deemed to be as similar in age, gla, land size and amenities to that of the subject property. From that pool of sales the most similar and relevant sales and listings were chosen to use in our sales comparison approach. It is the appraiser's opinion based on age, gla, land size, amenities as well as over 13 years of appraisal experience in the subject's market that the sales and listings used in the sales comparison approach are the best sales and most indicative of the subject's estimate of value.

Age adjustment

It is noted that some of the sales are older than that of the subject property. Based on the rate of depreciation in the area that range from .5% up to 3% we have made an age based adjustment of 1% per year for any of the sales that were +/- 4 years of age to that of the subject property. This adjustment is well within the rate of depreciation for the area and deemed reasonable given the age of the subject, condition and quality of construction. Depreciation adjustment for Comp= (Difference from subject in effective/act age) X (reconciled annual depreciation rate) X (Replacement Cost New for Comp)

RV Garage

Some of the sales and listings used in our analysis have RV garages and some of the sales and or listings do not have this amenity. Based on the sales and listings in the area the typical shop adds -2% up to -4% of value contributions to a property. Using -2% as the basis of our adjustment, which is well within the typical range, we have applied an adjustment to any sale or listing with RV garages.

Sale #1 (8973 New Castle Dr) This sale has closed and recorded within the past 4 months. This sale is located on a smaller size parcel of land as the subject property. This sale is smaller in total square footage and has a larger total bathroom count. Adjustments have been applied to this sale for land size, quality of construction, bathroom counts, sqft and rv garage.

All adjustments are located within the required ranges.

Sale #2 (24542 Kenridge Rd) This sale has closed and recorded within the past 9 months. This sale is located on a larger size parcel of land as the subject property. This sale is smaller in total square footage and has the same total bathroom count. Adjustments have been applied to this sale for land size, sqft and bathroom counts. This sale has exceeded the 25% gross adjustment ratio. This could not be avoided given the difference in land size and sqft.

All adjustments are located within the required ranges.

Sale #3 (12825 Quail Run Ln) This sale has closed and recorded within the past 1 month. This sale is located on a similar size parcel of land as the subject property. This sale is smaller in total square footage and has a larger total bathroom count. Adjustments have been applied to this sale for age, bathroom counts and sqft.

General Text Addendum

File No. 2610-00030

Borrower	Christopher Sutton						
Property Address	8629 Latimore Ln						
City	Middleton	County	Canyon	State	ID	Zip Code	83644
Lender/Client	Deephaven Mortgage LLC						

All adjustments are located within the required ranges.

Sale #4 (8991 Edna Ln) This sale has closed and recorded within the past 5 months. This sale is located on a similar size parcel of land as the subject property. This sale is larger in total square footage and has a larger total bathroom count. Adjustments have been applied to this sale for age, bathroom counts, adu and rv garage.

All adjustments are located within the required ranges.

Listing #5 (12711 Draft St) This listing is located on a similar size parcel of land. This listing is smaller in total square footage and has a larger total bathroom count. Adjustments have been applied to this listing for quality of construction, age, bathroom counts, sqft and rv garage.

All adjustments are located within the required ranges.

Listing #6 (24053 Pheasant Ridge Ct) This listing is located on a larger size parcel of land. This listing is smaller in total square footage and has the same total bathroom count. Adjustments have been applied to this listing for land size, sqft and no adu.

All adjustments are located within the required ranges.

None of the sales and listings used exceeded the 15% net and 25% gross adjustment ratio.

Sales used were good value indicators for that of the subject property. Final indicated value for the subject is noted to be within the adjusted range of all sales used with no consideration given to the unadjusted sales prices of all sales.

Adjustments for the sales were as a result of differences of the sales to that of the subject and items that are typically recognized within the market place. Adjustments have been derived from either market extraction or paired sales analysis and the appraisers knowledge of the subjects marketing area. All adjustments that were made were market driven and were felt to be reasonable.

Estimated value for the subject property is bracketed by the unadjusted sales price of the sales comparable used in the report as well as supports the subjects current contract price.

Most consideration was given to sale #1, this sale has a similar adu, as the subject. Sale #3 has the lowest gross adjustment ratio and is similar in sqft to that of the subject. Sale #4, brackets the high side of the subject's sqft. Followed by sale #2. These sales bracket the subject in age, sqft, land size along with supporting the opinion of value.

The listings were included to help show current market condition for similar properties to that of the subject with strong consideration given to the listings at this time. The listings show the low end as well as the higher end of the competing properties that were similar to the subject property within the subject's immediate area.

Given the overall condition and amenities of the subject property the appraiser estimated the market value for the subject property to be in the mid-range of the adjusted sales comparable used in the appraiser's analysis. In the appraiser's opinion, the sales and listings used were the best and most similar to the subject and represent a good comparable to that of the subject property.

The appraiser has considered relevant competitive listings/contract offerings in performing this appraisal, and any trend indicated by that data is supported by the listing/offering information included in this report.

ADU

The subject is noted as having a detached Accessory Dwelling Unit (ADU). Some of the sales and listings used in our analysis have similar ADU's and some of the sales and or listings do not have this amenity. Based on the sales and listings in the area, the typical shop adds 6% up to 12% of value contributions to a property. Using 10% as the basis of our adjustment, which is well within the typical range, we have applied an adjustment to any sale or listing without an ADU.

GLA differential exceeds 20%

Please note that the GLA differential for some comparables exceeds 20%. This is attributed to the lack of available recent comparable similar in terms of GLA. The appraiser was forced to utilize homes that were inferior | superior in terms of square footage and make the necessary adjustments.

AIR Compliance Statement

"No employee, director, officer, or agent of the lender, or any other third party acting as joint venture partner, independent contractor, appraisal management company, or partner on behalf of the lender, shall influence or attempt to influence the development, reporting, result, or review of an appraisal through coercion, extortion, collusion, compensation, instruction, inducement, intimidation, bribery, or in any other manner.

Instructions: The appraiser must use the information required on this form as the basis for his/her conclusions, and must provide support for those conclusions, regarding housing trends and overall market conditions as reported in the Neighborhood section of the appraisal report form. The appraiser must fill in all the information to the extent it is available and reliable and must provide analysis as indicated below. If any required data is unavailable or is considered unreliable, the appraiser must provide an explanation. It is recognized that not all data sources will be able to provide data for the shaded areas below; if it is available, however, the appraiser must include the data in the analysis. If data sources provide the required information as an average instead of the median, the appraiser should report the available figure and identify it as an average. Sales and listings must be properties that compete with the subject property, determined by applying the criteria that would be used by a prospective buyer of the subject property. The appraiser must explain any anomalies in the data, such as seasonal markets, new construction, foreclosures, etc.

Cite data sources for above information. Imls / County records

Summarize the above information as support for your conclusions in the Neighborhood section of the appraisal report form. If you used any additional information, such as an analysis of pending sales and/or expired and withdrawn listings, to formulate your conclusions, provide both an explanation and support for your conclusions.

It is noted that Idaho is a non-disclosure state and that we have one source of sales data available. Which the intermountain multiple listing service. Currently our IMLS does not have the capability to listing the total number of active listings that are available on the market at a given time frame. The system can give us the total number for new listings for specific time frame only. This will not include existing listings or listings that have changed status to "pending or sold". For this reason, the information provided within this report is of new listing for that time period and not all properties that are available within a specific time frame. The information provided still gives the reader of this report a good indication of what the market is doing and is the best and only information that can be provided at this time. A complete market analysis is provided within the body of this report under the market condition section.

CONDO/CO-OP PROJECTS

If the subject is a unit in a condominium or cooperative project , complete the following: **Project Name:**

Subject Project Data	Prior 7–12 Months	Prior 4–6 Months	Current – 3 Months	Overall Trend		
Total # of Comparable Sales (Settled)				☐ Increasing	☐ Stable	☐ Declining
Absorption Rate (Total Sales/Months)				☐ Increasing	☐ Stable	☐ Declining
Total # of Active Comparable Listings				☐ Declining	☐ Stable	☐ Increasing
Months of Unit Supply (Total Listings/Ab.Rate)				☐ Declining	☐ Stable	☐ Increasing

Are foreclosure sales (REO sales) a factor in the project? ☐ Yes ☐ No If yes, indicate the number of REO listings and explain the trends in listings and sales of foreclosed properties.

Summarize the above trends and address the impact on the subject unit and project.

(Source: Fannie Mae UAD Appendix D: UAD Field-Specific Standardization Requirements)

Condition Ratings and Definitions

C1

The improvements have been recently constructed and have not been previously occupied. The entire structure and all components are new and the dwelling features no physical depreciation.

Note: Newly constructed improvements that feature recycled or previously used materials and/or components can be considered new dwellings provided that the dwelling is placed on a 100 percent new foundation and the recycled materials and the recycled components have been rehabilitated/remanufactured into like-new condition. Improvements that have not been previously occupied are not considered “new” if they have any significant physical depreciation (that is, newly constructed dwellings that have been vacant for an extended period of time without adequate maintenance or upkeep).

C2

The improvements feature no deferred maintenance, little or no physical depreciation, and require no repairs. Virtually all building components are new or have been recently repaired, refinished, or rehabilitated. All outdated components and finishes have been updated and/or replaced with components that meet current standards. Dwellings in this category are either almost new or have been recently completely renovated and are similar in condition to new construction.

Note: The improvements represent a relatively new property that is well maintained with no deferred maintenance and little or no physical depreciation, or an older property that has been recently completely renovated.

C3

The improvements are well maintained and feature limited physical depreciation due to normal wear and tear. Some components, but not every major building component, may be updated or recently rehabilitated. The structure has been well maintained.

Note: The improvement is in its first-cycle of replacing short-lived building components (appliances, floor coverings, HVAC, etc.) and is being well maintained. Its estimated effective age is less than its actual age. It also may reflect a property in which the majority of short-lived building components have been replaced but not to the level of a complete renovation.

C4

The improvements feature some minor deferred maintenance and physical deterioration due to normal wear and tear. The dwelling has been adequately maintained and requires only minimal repairs to building components/mechanical systems and cosmetic repairs. All major building components have been adequately maintained and are functionally adequate.

Note: The estimated effective age may be close to or equal to its actual age. It reflects a property in which some of the short-lived building components have been replaced, and some short-lived building components are at or near the end of their physical life expectancy; however, they still function adequately. Most minor repairs have been addressed on an ongoing basis resulting in an adequately maintained property.

C5

The improvements feature obvious deferred maintenance and are in need of some significant repairs. Some building components need repairs, rehabilitation, or updating. The functional utility and overall livability is somewhat diminished due to condition, but the dwelling remains useable and functional as a residence.

Note: Some significant repairs are needed to the improvements due to the lack of adequate maintenance. It reflects a property in which many of its short-lived building components are at the end of or have exceeded their physical life expectancy but remain functional.

C6

The improvements have substantial damage or deferred maintenance with deficiencies or defects that are severe enough to affect the safety, soundness, or structural integrity of the improvements. The improvements are in need of substantial repairs and rehabilitation, including many or most major components.

Note: Substantial repairs are needed to the improvements due to the lack of adequate maintenance or property damage. It reflects a property with conditions severe enough to affect the safety, soundness, or structural integrity of the improvements.

Quality Ratings and Definitions

Q1

Dwellings with this quality rating are usually unique structures that are individually designed by an architect for a specified user. Such residences typically are constructed from detailed architectural plans and specifications and feature an exceptionally high level of workmanship and exceptionally high-grade materials throughout the interior and exterior of the structure. The design features exceptionally high-quality exterior refinements and ornamentation, and exceptionally high-quality interior refinements. The workmanship, materials, and finishes throughout the dwelling are of exceptionally high quality.

Q2

Dwellings with this quality rating are often custom designed for construction on an individual property owner’s site. However, dwellings in this quality grade are also found in high-quality tract developments featuring residence constructed from individual plans or from highly modified or upgraded plans. The design features detailed, high quality exterior ornamentation, high-quality interior refinements, and detail. The workmanship, materials, and finishes throughout the dwelling are generally of high or very high quality.

UNIFORM APPRAISAL DATASET (UAD) DEFINITIONS ADDENDUM

(Source: Fannie Mae UAD Appendix D: UAD Field-Specific Standardization Requirements)

Quality Ratings and Definitions (continued)

Q3

Dwellings with this quality rating are residences of higher quality built from individual or readily available designer plans in above-standard residential tract developments or on an individual property owner's site. The design includes significant exterior ornamentation and interiors that are well finished. The workmanship exceeds acceptable standards and many materials and finishes throughout the dwelling have been upgraded from "stock" standards.

Q4

Dwellings with this quality rating meet or exceed the requirements of applicable building codes. Standard or modified standard building plans are utilized and the design includes adequate fenestration and some exterior ornamentation and interior refinements. Materials, workmanship, finish, and equipment are of stock or builder grade and may feature some upgrades.

Q5

Dwellings with this quality rating feature economy of construction and basic functionality as main considerations. Such dwellings feature a plain design using readily available or basic floor plans featuring minimal fenestration and basic finishes with minimal exterior ornamentation and limited interior detail. These dwellings meet minimum building codes and are constructed with inexpensive, stock materials with limited refinements and upgrades.

Q6

Dwellings with this quality rating are of basic quality and lower cost; some may not be suitable for year-round occupancy. Such dwellings are often built with simple plans or without plans, often utilizing the lowest quality building materials. Such dwellings are often built or expanded by persons who are professionally unskilled or possess only minimal construction skills. Electrical, plumbing, and other mechanical systems and equipment may be minimal or non-existent. Older dwellings may feature one or more substandard or non-conforming additions to the original structure

Definitions of Not Updated, Updated, and Remodeled

Not Updated

Little or no updating or modernization. This description includes, but is not limited to, new homes.

Residential properties of fifteen years of age or less often reflect an original condition with no updating, if no major components have been replaced or updated. Those over fifteen years of age are also considered not updated if the appliances, fixtures, and finishes are predominantly dated. An area that is 'Not Updated' may still be well maintained and fully functional, and this rating does not necessarily imply deferred maintenance or physical/functional deterioration.

Updated

The area of the home has been modified to meet current market expectations. These modifications are limited in terms of both scope and cost.

An updated area of the home should have an improved look and feel, or functional utility. Changes that constitute updates include refurbishment and/or replacing components to meet existing market expectations. Updates do not include significant alterations to the existing structure.

Remodeled

Significant finish and/or structural changes have been made that increase utility and appeal through complete replacement and/or expansion.

A remodeled area reflects fundamental changes that include multiple alterations. These alterations may include some or all of the following: replacement of a major component (cabinet(s), bathtub, or bathroom tile), relocation of plumbing/gas fixtures/appliances, significant structural alterations (relocating walls, and/or the addition of) square footage). This would include a complete gutting and rebuild.

Explanation of Bathroom Count

Three-quarter baths are counted as a full bath in all cases. Quarter baths (baths that feature only a toilet) are not included in the bathroom count. The number of full and half baths is reported by separating the two values using a period, where the full bath count is represented to the left of the period and the half bath count is represented to the right of the period.

Example:
3.2 indicates three full baths and two half baths.

ENVIRONMENTAL ADDENDUM

APPARENT* HAZARDOUS SUBSTANCES AND/OR DETRIMENTAL ENVIRONMENTAL CONDITIONS

10 18 2026
File # 2610-00030

Borrower	Christopher Sutton						
Property Address	8629 Latimore Ln						
City	Middleton	County	Canyon	State	ID	Zip Code	83644
Lender/Client	Deephaven Mortgage LLC						

***Apparent is defined as that which is visible, obvious, evident or manifest to the appraiser.**

This Environmental Addendum is for use with any real estate appraisal. Only the statements which have been marked by the appraiser apply to the Subject property.

This addendum reports the results of the appraiser's routine viewing of and inquiries about the subject property and its surrounding area. It also states what assumptions were made about any observed evidence of any hazardous substances and/or detrimental environmental conditions. **The appraiser is not an expert environmental inspector** and therefore might be unaware of existing hazardous substances and/or detrimental environmental conditions which may have a negative effect on the safety or value of the property. It is possible that tests and inspections made by a qualified environmental inspector would reveal the existence of hazardous materials and/or detrimental environmental conditions on or around the property that would negatively affect its safety and value.

DRINKING WATER

☒ Drinking water is supplied to the subject from a municipal water supply which is considered safe. However, the only way to be absolutely certain that the water meets published standards is to have it tested at all discharge points.

☐ Drinking water is supplied by a well or other non-municipal source. It is recommended that tests be made to be certain that the property is supplied with adequate drinking water.

☒ Lead can get into drinking water from its source, the pipes, at all discharge points, plumbing fixtures and/or appliances. The only way to be certain that water does not contain an unacceptable lead level is to have it tested at all discharge points.

☒ **The opinion of value is based on the assumption that there is an adequate supply of safe, lead-free drinking water.**

Comments:

SEWER SYSTEM

☒ Sewage is removed from the property by a municipal sewer system.

☐ Sewage is disposed of by a septic system or other sanitary on-site waste disposal system. The only way to determine that the disposal system is adequate and in good good working condition is to have it inspected by a qualified inspector.

☒ **The opinion of value is based on the assumption that the sewage is disposed of by a municipal sewer or an adequate properly permitted alternate treatment system in good condition.**

Comments:

SOIL CONTAMINANTS

☒ There are no apparent signs of soil contaminants on or near the subject property (except as stated in Comments, below). It is possible that research, inspection and testing by a qualified environmental inspector would reveal existing and/or potential hazardous substances and/or detrimental environmental conditions on or around the property that would negatively affect its safety and value.

☒ **The opinion of value is based on the assumption that the subject property is free of soil contaminants.**

Comments:

ASBESTOS

☒ All or part of the improvements were constructed before 1979 when asbestos was a common building material. The only way to be certain that the property is free of friable and non-friable asbestos is to have it inspected and tested by a qualified asbestos inspector.

☐ The improvements were constructed after 1979. No apparent friable asbestos was observed (except as stated in Comments, below).

☐ **The opinion of value is based on the assumption that there is no uncontained friable asbestos or other hazardous asbestos material on the property.**

Comments:

PCBs (POLYCHLORINATED BIPHENYLS)

☒ There were no apparent leaking fluorescent light ballasts, capacitors or transformers anywhere on or nearby the property (except as stated in Comments, below).

☒ There was no apparent visible or documented evidence known to the appraiser of soil or groundwater contamination from PCBs anywhere on the property (except as reported in Comments below).

☒ **The opinion of value is based on the assumption that there are no uncontained PCBs on or nearby the property.**

Comments:

RADON

☒ The appraiser is not aware of any radon tests made on the subject property within the past 12 months (except as stated in Comments, below).

☒ The appraiser is not aware of any indication that the local water supplies have been found to have elevated levels of radon or radium.

☒ The appraiser is not aware of any nearby properties (except as stated in Comments, below) that were or currently are used for uranium, thorium or radium extraction or phosphate processing.

☒ **The opinion of value is based on the assumption that the Radon level is at or below EPA recommended levels.**

Comments:

USTs (UNDERGROUND STORAGE TANKS)

☒ There is no apparent visible or documented evidence known to the appraiser of any USTs on the property nor any known historical use of the property that would likely have had USTs.

☒ There are no apparent petroleum storage and/or delivery facilities (including gasoline stations or chemical manufacturing plants) located on adjacent properties (except as reported in Comments below).

☐ There are apparent signs of USTs existing now or in the past on the subject property. It is recommended that an inspection by a qualified UST inspector be obtained to determine the location of any USTs together with their condition and proper registration if they are active; and if they are inactive, to determine whether they were deactivated in accordance with sound industry practices.

☒ **The opinion of value is based on the assumption that any functioning USTs are not leaking and are properly registered and that any abandoned USTs are free from contamination and were properly drained, filled and sealed.**

Comments: _____

NEARBY HAZARDOUS WASTE SITES

☒ There are no apparent hazardous waste sites on the subject property or nearby the subject property (except as stated in Comments, below). Hazardous Waste Site search by a trained environmental engineer may determine that there is one or more hazardous waste sites on or in the area of the subject property.

☒ **The opinion of value is based on the assumption that there are no hazardous waste sites on or nearby the subject property that negatively affect the value or safety of the property.**

Comments: _____

UREA FORMALDEHYDE INSULATION (UFFI)

☒ All or part of the improvements were constructed before 1982 when urea foam insulation was a common building material. The only way to be certain that the property is free of urea formaldehyde is to have it inspected by a qualified urea formaldehyde inspector.

☐ The improvements were constructed after 1982. No apparent urea formaldehyde materials were observed (except as stated in Comments, below).

☒ **The opinion of value is based on the assumption that there is no significant UFFI insulation or other urea formaldehyde material on the property.**

Comments: _____

LEAD BASED PAINT

☒ All or part of the improvements were constructed before 1978 when lead based paint was a common building material. There is no apparent visible or known documented evidence of peeling or flaking Lead Paint on the floors, walls or ceilings (except as stated in Comments, below). The only way to be certain that the property is free of surface or subsurface lead based paint is to have it inspected by a qualified inspector.

☐ The improvements were constructed after 1978. No apparent Lead Paint was observed (except as stated in Comments, below).

☒ **The opinion of value is based on the assumption that there is no flaking or peeling Lead Paint on the property.**

Comments: _____

AIR POLLUTION

☒ There are no apparent signs of air pollution at the time of the appraiser's viewing of the subject property, nor were any reported (except as reported in Comments, below). The only way to be certain that the air is free of pollution is to have it tested.

☒ **The opinion of value is based on the assumption that the property is free of air pollution.**

Comments: _____

WETLANDS/FLOOD PLAINS

☒ The site does not contain any apparent wetlands/flood plains (except as stated in Comments, below). The only way to be certain that the site is free of wetlands/flood plains is to have it inspected by a qualified environmental professional.

☒ **The opinion of value is based on the assumption that there are no Wetlands/Flood Plains on the property (except as stated in Comments, below).**

Comments: _____

MISCELLANEOUS ENVIRONMENTAL HAZARDS

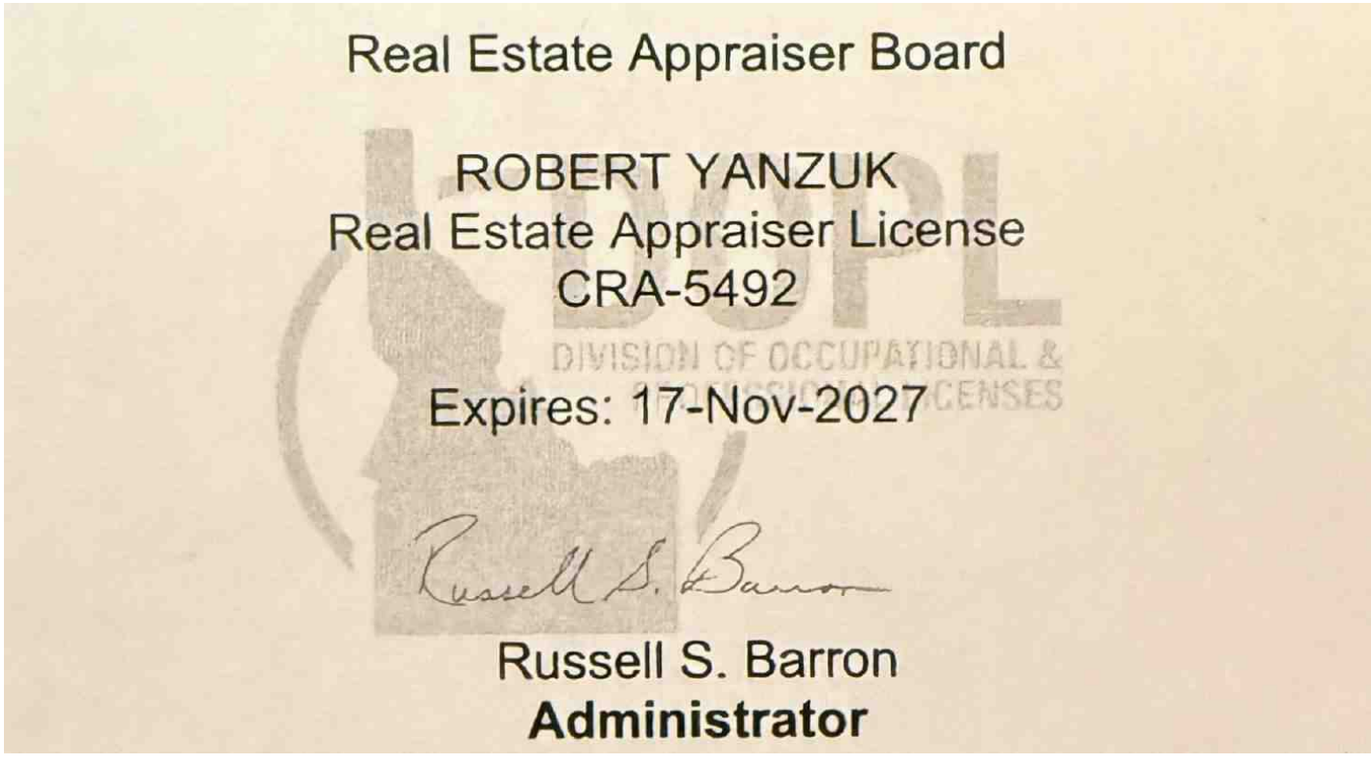

☒ There are no other apparent hazardous substances and/or detrimental environmental conditions on or in the area of the site except as indicated below:

- ☐ Excess noise _____
- ☐ Radiation and/or electromagnetic radiation _____
- ☐ Light pollution _____
- ☐ Waste heat _____
- ☐ Acid mine drainage _____
- ☐ Agricultural pollution _____
- ☐ Geological hazards _____
- ☐ Nearby hazardous property _____
- ☐ Infectious medical wastes _____
- ☐ Pesticides _____
- ☐ Other (chemical storage, drums, pipelines, etc.) _____

☒ **The opinion of value is based on the assumption that, except as reported above, there are no other environmental hazards that would negatively affect the value of the subject property.**

When any of the environmental assumptions made in this addendum are not correct, the opinion of value in this appraisal may be affected.

Area Calculations Summary

Living Area		**Calculation Details**		
First Floor	2375.05 Sq ft	16 × 12	=	192
		7 × 5	=	35
		24.5 × 19	=	465.5
		19 × 8	=	152
		37 × 13	=	481
		4 × 2	=	8
		25.5 × 33.9	=	864.45
		7 × 25.3	=	177.1
Second Floor	1462 Sq ft	8 × 3	=	24
		8 × 3	=	24
		21 × 13	=	273
		17 × 12.5	=	212.5
		9 × 8.5	=	76.5
		16 × 7.5	=	120
		12 × 35.5	=	426
		11 × 9	=	99
		9 × 7	=	63
		19.5 × 7	=	136.5
		0.5 × 3.5 × 2	=	3.5
		0.5 × 4 × 2	=	4
Total Living Area (Rounded):	**3837 Sq ft**			
Non-living Area				
Cov. Porch	342.9 Sq ft	8.2 × 7	=	57.4
		7 × 23.5	=	164.5
		10 × 10	=	100
		2 × 10.5	=	21
Cov Patio	538 Sq ft	12 × 21.5	=	258
		20 × 14	=	280
3 Car Attached	1051 Sq ft	26 × 39.5	=	1027
		12 × 2	=	24
ADU	1823.5 Sq ft	41 × 15	=	615
		24 × 42	=	1008
		14 × 12	=	168
		6.5 × 5	=	32.5
