Fastapp Appraisal Management Company
Paramount Residential Mortgage Group
1265 Corona Pointe Ct Ste 301
Corona, CA, 92879

File Number: **26100306**

Dear Loan Processor:

In accordance with your request, I have appraised the real property at:

15591 S State Highway 21
Potosi, MO 63664

The purpose of this appraisal is to develop an opinion of the market value of the subject property, as improved. The property rights appraised are the fee simple interest in the site and improvements.

In my opinion, the market value of the property as of **October 9, 2026** is:

$135,000
One Hundred Thirty-Five Thousand Dollars

The attached report contains the description, analysis and supportive data for the conclusions, final opinion of value, descriptive photographs, limiting conditions and appropriate certifications.

Sincerely,

Rick Gendron

This letter of transmittal is not an appraisal. It can not be used or relied upon if detached from

the full appraisal report, on a 1004, form with all it's attachments.

Uniform Residential Appraisal Report

R26-000045
File No. 26100306

The purpose of this summary appraisal report is to provide the lender/client with an accurate, and adequately supported, opinion of the market value of the subject property.

SUBJECT

Property Address **15591 S State Highway 21** City **Potosi** State **MO** Zip Code **63664**
Borrower **Melvin Courtney III** Owner of Public Record **Martin Terece Properties LLC** County **Washington**
Legal Description **Bust Subdivision Part of Lot 10**
Assessor's Parcel # **22-1.0-012-000-000-021.00000** Tax Year **2025** R.E. Taxes $ **360**
Neighborhood Name **Washington County** Map Reference **22-1-12** Census Tract **4605**
Occupant [ ] Owner [ ] Tenant [X] Vacant Special Assessments $ **0** [ ] PUD HOA $ **0** [ ] per year [ ] per month
Property Rights Appraised [X] Fee Simple [ ] Leasehold [ ] Other (describe)
Assignment Type [X] Purchase Transaction [ ] Refinance Transaction [ ] Other (describe)
Lender/Client **Paramount Residential Mortgage Group** Address **1265 Corona Pointe Ct Ste 301, Corona, CA 92879**
Is the subject property currently offered for sale or has it been offered for sale in the twelve months prior to the effective date of this appraisal? [X] Yes [ ] No
Report data source(s) used, offering price(s), and date(s). **DOM 2;St. Louis Area MLS#26060635. The subject property entered the market on 09/18/2026 for $119,900.**

CONTRACT

I [X] did [ ] did not analyze the contract for sale for the subject purchase transaction. Explain the results of the analysis of the contract for sale or why the analysis was not performed.
Arms length sale; The contract states that the seller will pay ($6,500) toward the buyer's closing costs. This appears to be an arm's-length transaction, and assuming that the parties were acting in their own best interests (per definition of market value), the price was likely affected by the concession.
Contract Price $ **127,000** Date of Contract **09/25/2026** Is the property seller the owner of public record? [X] Yes [ ] No Data Source(s) **Public Record**
Is there any financial assistance (loan charges, sale concessions, gift or downpayment assistance, etc.) to be paid by any party on behalf of the borrower? [X] Yes [ ] No
If Yes, report the total dollar amount and describe the items to be paid. **$6500;;Closing Costs.**

NEIGHBORHOOD

Note: Race and the racial composition of the neighborhood are not appraisal factors.

Neighborhood Characteristics				One-Unit Housing Trends				One-Unit Housing		Present Land Use %

Neighborhood Description **The subject neighborhood consists of a typical rural/suburban mix of improvement styles & ages, which includes manufactured housing on acreage. The majority of the properties are in average condition & the neighborhood has average market appeal. "Other" is undeveloped land. Nothing adverse was observed or considered affecting marketability.**
Market Conditions (including support for the above conclusions) **The local market has been stable during the past year, based on at least 12 months history based on the entire county of Washington. Listing activity is in balance. The average marketing time in the subject area based on MLS reporting of typical sales is approximately 75 days. The final value estimated assumes a typical marketing period.**

Summary of Sales Comparison Approach. **See Attached Addendum**

Indicated Value by Sales Comparison Approach $ **135,000**

RECONCILIATION

Indicated Value by: Sales Comparison Approach $ 135,000 **Cost Approach (if developed) $ 169,200** **Income Approach (if developed) $**

Most consideration is on the Sales Comparison because it reflects buying/selling activity in the market. The Cost Approach supports the final value estimated. The Income Approach was not considered because homes are normally not purchased for investment purposes.

This appraisal is made [X] "as is," [ ] subject to completion per plans and specifications on the basis of a hypothetical condition that the improvements have been completed, [ ] subject to the following repairs or alterations on the basis of a hypothetical condition that the repairs or alterations have been completed, or [ ] subject to the following required inspection based on the extraordinary assumption that the condition or deficiency does not require alteration or repair:

Based on a complete visual inspection of the interior and exterior areas of the subject property, defined scope of work, statement of assumptions and limiting conditions, and appraiser's certification, my (our) opinion of the market value, as defined, of the real property that is the subject of this report is $ 135,000 as of 10/09/2026 , which is the date of inspection and the effective date of this appraisal.

ADDITIONAL COMMENTS

ADDITIONAL COMMENTS AND CERTIFICATIONS:

The digital images included in this report are original images captured either from a digital camera or scanner. These images have not been altered in any way, unless to blur portions for USPAP compliance.

All photos of closed comparable sales were taken by the appraiser. Comparable sales with seasonal differences were taken during the current listing period or after closing. Gated properties include a photo of the gate with MLS photo as an inset. This satisfies the requirement in the scope of this assignment, to view the comparable sales from the street.

The digital images of plat maps included in the report are a representation of the subject property. While the shape of the property is accurate, the placement of the property boundaries are general in scope and not considered to be the actual location of the boundaries. These images are overlays and typically have errors in placement.

The digital signatures and seals in this report are password protected. The appraiser(s) signing the report have sole personalized control of affixing the signature.

Under the current USPAP definitions, any reference in this report to an estimate of value must be interpreted by the users(s) of this report to mean "opinion of value". There have been no mechanical methodology to derive an estimate of value. The three approaches to value have been considered and reconciled into an opinion of market value, as of the date specified in this report.

No one provided significant real property appraisal assistance to the person signing the certifications.

I certify that, to the best of my knowledge and belief, the reported analysis, opinions and conclusions were developed, and this report has been prepared, in conformity with the requirements of the Code of Professional Ethics and the Standards of Professional Appraisal Practice of the Appraisal Institute.

I certify that the use of this report is subject to the requirements of the Appraisal Institute relating to review by its duly authorized representatives.

ANSI Declaration: The subject finished square footage (GLA), for this residence, was obtained by physically measuring the improvements, using ANSI Z765-2021 Standards of Measurement.

Does the project contain any multi-dwelling units? ☐ Yes ☐ No Data source(s)

Are the units, common elements, and recreation facilities complete? ☐ Yes ☐ No If No, describe the status of completion. _____

Are the common elements leased to or by the Homeowners' Association? ☐ Yes ☐ No If Yes, describe the rental terms and options. _____

Describe common elements and recreational facilities. _____

Uniform Residential Appraisal Report

R26-000045
File No. 26100306

This report form is designed to report an appraisal of a one-unit property or a one-unit property with an accessory unit; including a unit in a planned unit development (PUD). This report form is not designed to report an appraisal of a manufactured home or a unit in a condominium or cooperative project.

This appraisal report is subject to the following scope of work, intended use, intended user, definition of market value, statement of assumptions and limiting conditions, and certifications. Modifications, additions, or deletions to the intended use, intended user, definition of market value, or assumptions and limiting conditions are not permitted. The appraiser may expand the scope of work to include any additional research or analysis necessary based on the complexity of this appraisal assignment. Modifications or deletions to the certifications are also not permitted. However, additional certifications that do not constitute material alterations to this appraisal report, such as those required by law or those related to the appraiser's continuing education or membership in an appraisal organization, are permitted.

SCOPE OF WORK: The scope of work for this appraisal is defined by the complexity of this appraisal assignment and the reporting requirements of this appraisal report form, including the following definition of market value, statement of assumptions and limiting conditions, and certifications. The appraiser must, at a minimum: (1) perform a complete visual inspection of the interior and exterior areas of the subject property, (2) inspect the neighborhood, (3) inspect each of the comparable sales from at least the street, (4) research, verify, and analyze data from reliable public and/or private sources, and (5) report his or her analysis, opinions, and conclusions in this appraisal report.

INTENDED USE: The intended use of this appraisal report is for the lender/client to evaluate the property that is the subject of this appraisal for a mortgage finance transaction.

INTENDED USER: The intended user of this appraisal report is the lender/client.

DEFINITION OF MARKET VALUE: The most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller, each acting prudently, knowledgeably and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby: (1) buyer and seller are typically motivated; (2) both parties are well informed or well advised, and each acting in what he or she considers his or her own best interest; (3) a reasonable time is allowed for exposure in the open market; (4) payment is made in terms of cash in U. S. dollars or in terms of financial arrangements comparable thereto; and (5) the price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions* granted by anyone associated with the sale.

*Adjustments to the comparables must be made for special or creative financing or sales concessions. No adjustments are necessary for those costs which are normally paid by sellers as a result of tradition or law in a market area; these costs are readily identifiable since the seller pays these costs in virtually all sales transactions. Special or creative financing adjustments can be made to the comparable property by comparisons to financing terms offered by a third party institutional lender that is not already involved in the property or transaction. Any adjustment should not be calculated on a mechanical dollar for dollar cost of the financing or concession but the dollar amount of any adjustment should approximate the market's reaction to the financing or concessions based on the appraiser's judgment.

STATEMENT OF ASSUMPTIONS AND LIMITING CONDITIONS: The appraiser's certification in this report is subject to the following assumptions and limiting conditions:

1. The appraiser will not be responsible for matters of a legal nature that affect either the property being appraised or the title to it, except for information that he or she became aware of during the research involved in performing this appraisal. The appraiser assumes that the title is good and marketable and will not render any opinions about the title.

2. The appraiser has provided a sketch in this appraisal report to show the approximate dimensions of the improvements. The sketch is included only to assist the reader in visualizing the property and understanding the appraiser's determination of its size.

3. The appraiser has examined the available flood maps that are provided by the Federal Emergency Management Agency (or other data sources) and has noted in this appraisal report whether any portion of the subject site is located in an identified Special Flood Hazard Area. Because the appraiser is not a surveyor, he or she makes no guarantees, express or implied, regarding this determination.

4. The appraiser will not give testimony or appear in court because he or she made an appraisal of the property in question, unless specific arrangements to do so have been made beforehand, or as otherwise required by law.

5. The appraiser has noted in this appraisal report any adverse conditions (such as needed repairs, deterioration, the presence of hazardous wastes, toxic substances, etc.) observed during the inspection of the subject property or that he or she became aware of during the research involved in performing this appraisal. Unless otherwise stated in this appraisal report, the appraiser has no knowledge of any hidden or unapparent physical deficiencies or adverse conditions of the property (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) that would make the property less valuable, and has assumed that there are no such conditions and makes no guarantees or warranties, express or implied. The appraiser will not be responsible for any such conditions that do exist or for any engineering or testing that might be required to discover whether such conditions exist. Because the appraiser is not an expert in the field of environmental hazards, this appraisal report must not be considered as an environmental assessment of the property.

6. The appraiser has based his or her appraisal report and valuation conclusion for an appraisal that is subject to satisfactory completion, repairs, or alterations on the assumption that the completion, repairs, or alterations of the subject property will be performed in a professional manner.

APPRAISER'S CERTIFICATION: The Appraiser certifies and agrees that:

1. I have, at a minimum, developed and reported this appraisal in accordance with the scope of work requirements stated in this appraisal report.

2. I performed a complete visual inspection of the interior and exterior areas of the subject property. I reported the condition of the improvements in factual, specific terms. I identified and reported the physical deficiencies that could affect the livability, soundness, or structural integrity of the property.

3. I performed this appraisal in accordance with the requirements of the Uniform Standards of Professional Appraisal Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and that were in place at the time this appraisal report was prepared.

4. I developed my opinion of the market value of the real property that is the subject of this report based on the sales comparison approach to value. I have adequate comparable market data to develop a reliable sales comparison approach for this appraisal assignment. I further certify that I considered the cost and income approaches to value but did not develop them, unless otherwise indicated in this report.

5. I researched, verified, analyzed, and reported on any current agreement for sale for the subject property, any offering for sale of the subject property in the twelve months prior to the effective date of this appraisal, and the prior sales of the subject property for a minimum of three years prior to the effective date of this appraisal, unless otherwise indicated in this report.

6. I researched, verified, analyzed, and reported on the prior sales of the comparable sales for a minimum of one year prior to the date of sale of the comparable sale, unless otherwise indicated in this report.

7. I selected and used comparable sales that are locationally, physically, and functionally the most similar to the subject property.

8. I have not used comparable sales that were the result of combining a land sale with the contract purchase price of a home that has been built or will be built on the land.

9. I have reported adjustments to the comparable sales that reflect the market's reaction to the differences between the subject property and the comparable sales.

10. I verified, from a disinterested source, all information in this report that was provided by parties who have a financial interest in the sale or financing of the subject property.

11. I have knowledge and experience in appraising this type of property in this market area.

12. I am aware of, and have access to, the necessary and appropriate public and private data sources, such as multiple listing services, tax assessment records, public land records and other such data sources for the area in which the property is located.

13. I obtained the information, estimates, and opinions furnished by other parties and expressed in this appraisal report from reliable sources that I believe to be true and correct.

14. I have taken into consideration the factors that have an impact on value with respect to the subject neighborhood, subject property, and the proximity of the subject property to adverse influences in the development of my opinion of market value. I have noted in this appraisal report any adverse conditions (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) observed during the inspection of the subject property or that I became aware of during the research involved in performing this appraisal. I have considered these adverse conditions in my analysis of the property value, and have reported on the effect of the conditions on the value and marketability of the subject property.

15. I have not knowingly withheld any significant information from this appraisal report and, to the best of my knowledge, all statements and information in this appraisal report are true and correct.

16. I stated in this appraisal report my own personal, unbiased, and professional analysis, opinions, and conclusions, which are subject only to the assumptions and limiting conditions in this appraisal report.

17. I have no present or prospective interest in the property that is the subject of this report, and I have no present or prospective personal interest or bias with respect to the participants in the transaction. I did not base, either partially or completely, my analysis and/or opinion of market value in this appraisal report on the race, color, religion, sex, age, marital status, handicap, familial status, or national origin of either the prospective owners or occupants of the subject property or of the present owners or occupants of the properties in the vicinity of the subject property or on any other basis prohibited by law.

18. My employment and/or compensation for performing this appraisal or any future or anticipated appraisals was not conditioned on any agreement or understanding, written or otherwise, that I would report (or present analysis supporting) a predetermined specific value, a predetermined minimum value, a range or direction in value, a value that favors the cause of any party, or the attainment of a specific result or occurrence of a specific subsequent event (such as approval of a pending mortgage loan application).

19. I personally prepared all conclusions and opinions about the real estate that were set forth in this appraisal report. If I relied on significant real property appraisal assistance from any individual or individuals in the performance of this appraisal or the preparation of this appraisal report, I have named such individual(s) and disclosed the specific tasks performed in this appraisal report. I certify that any individual so named is qualified to perform the tasks. I have not authorized anyone to make a change to any item in this appraisal report; therefore, any change made to this appraisal is unauthorized and I will take no responsibility for it.

20. I identified the lender/client in this appraisal report who is the individual, organization, or agent for the organization that ordered and will receive this appraisal report.

21. The lender/client may disclose or distribute this appraisal report to: the borrower; another lender at the request of the borrower; the mortgagee or its successors and assigns; mortgage insurers; government sponsored enterprises; other secondary market participants; data collection or reporting services; professional appraisal organizations; any department, agency, or instrumentality of the United States; and any state, the District of Columbia, or other jurisdictions; without having to obtain the appraiser's or supervisory appraiser's (if applicable) consent. Such consent must be obtained before this appraisal report may be disclosed or distributed to any other party (including, but not limited to, the public through advertising, public relations, news, sales, or other media).

Uniform Residential Appraisal Report

R26-000045
File No. 26100306

22. I am aware that any disclosure or distribution of this appraisal report by me or the lender/client may be subject to certain laws and regulations. Further, I am also subject to the provisions of the Uniform Standards of Professional Appraisal Practice that pertain to disclosure or distribution by me.

23. The borrower, another lender at the request of the borrower, the mortgagee or its successors and assigns, mortgage insurers, government sponsored enterprises, and other secondary market participants may rely on this appraisal report as part of any mortgage finance transaction that involves any one or more of these parties.

24. If this appraisal report was transmitted as an "electronic record" containing my "electronic signature," as those terms are defined in applicable federal and/or state laws (excluding audio and video recordings), or a facsimile transmission of this appraisal report containing a copy or representation of my signature, the appraisal report shall be as effective, enforceable and valid as if a paper version of this appraisal report were delivered containing my original hand written signature.

25. Any intentional or negligent misrepresentation(s) contained in this appraisal report may result in civil liability and/or criminal penalties including, but not limited to, fine or imprisonment or both under the provisions of Title 18, United States Code, Section 1001, et seq., or similar state laws.

SUPERVISORY APPRAISER'S CERTIFICATION: The Supervisory Appraiser certifies and agrees that:

1. I directly supervised the appraiser for this appraisal assignment, have read the appraisal report, and agree with the appraiser's analysis, opinions, statements, conclusions, and the appraiser's certification.

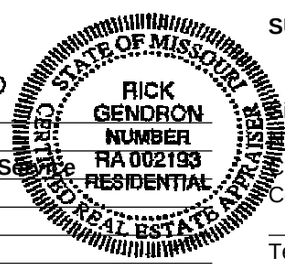

2. I accept full responsibility for the contents of this appraisal report including, but not limited to, the appraiser's analysis, opinions, statements, conclusions, and the appraiser's certification.

3. The appraiser identified in this appraisal report is either a sub-contractor or an employee of the supervisory appraiser (or the appraisal firm), is qualified to perform this appraisal, and is acceptable to perform this appraisal under the applicable state law.

4. This appraisal report complies with the Uniform Standards of Professional Appraisal Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and that were in place at the time this appraisal report was prepared.

5. If this appraisal report was transmitted as an "electronic record" containing my "electronic signature," as those terms are defined in applicable federal and/or state laws (excluding audio and video recordings), or a facsimile transmission of this appraisal report containing a copy or representation of my signature, the appraisal report shall be as effective, enforceable and valid as if a paper version of this appraisal report were delivered containing my original hand written signature.

Uniform Appraisal Dataset Definitions

R26-000045
File No. 26100306

Condition Ratings and Definitions

C1 The improvements have been very recently constructed and have not previously been occupied. The entire structure and all components are new and the dwelling features no physical depreciation.*

**Note: Newly constructed improvements that feature recycled materials and/or components can be considered new dwellings provided that the dwelling is placed on a 100% new foundation and the recycled materials and the recycled components have been rehabilitated/re-manufactured into like-new condition. Recently constructed improvements that have not been previously occupied are not considered "new" if they have any significant physical depreciation (i.e., newly constructed dwellings that have been vacant for an extended period of time without adequate maintenance or upkeep).*

C2 The improvements feature no deferred maintenance, little or no physical depreciation, and require no repairs. Virtually all building components are new or have been recently repaired, refinished, or rehabilitated. All outdated components and finishes have been updated and/or replaced with components that meet current standards. Dwellings in this category either are almost new or have been recently completely renovated and are similar in condition to new construction.

**Note: The improvements represent a relatively new property that is well maintained with no deferred maintenance and little or no physical depreciation, or an older property that has been recently completely renovated.*

C3 The improvements are well maintained and feature limited physical depreciation due to normal wear and tear. Some components, but not every major building component, may be updated or recently rehabilitated. The structure has been well maintained.

**Note: The improvement is in its first-cycle of replacing short-lived building components (appliances, floor coverings, HVAC, etc.) and is being well maintained. Its estimated effective age is less than its actual age. It also may reflect a property in which the majority of short-lived building components have been replaced but not to the level of a complete renovation.*

C4 The improvements feature some minor deferred maintenance and physical deterioration due to normal wear and tear. The dwelling has been adequately maintained and requires only minimal repairs to building components/mechanical systems and cosmetic repairs. All major building components have been adequately maintained and are functionally adequate.

**Note: The estimated effective age may be close to or equal to its actual age. It reflects a property in which some of the short-lived building components have been replaced, and some short-lived building components are at or near the end of their physical life expectancy; however, they still function adequately. Most minor repairs have been addressed on an ongoing basis resulting in an adequately maintained property.*

C5 The improvements feature obvious deferred maintenance and are in need of some significant repairs. Some building components need repairs, rehabilitation, or updating. The functional utility and overall livability is somewhat diminished due to condition, but the dwelling remains useable and functional as a residence.

**Note: Some significant repairs are needed to the improvements due to the lack of adequate maintenance. It reflects a property in which many of its short-lived building components are at the end of or have exceeded their physical life expectancy but remain functional.*

C6 The improvements have substantial damage or deferred maintenance with deficiencies or defects that are severe enough to affect the safety, soundness, or structural integrity of the improvements. The improvements are in need of substantial repairs and rehabilitation, including many or most major components.

**Note: Substantial repairs are needed to the improvements due to the lack of adequate maintenance or property damage. It reflects a property with conditions severe enough to affect the safety, soundness, or structural integrity of the improvements.*

Quality Ratings and Definitions

Q1 Dwellings with this quality rating are usually unique structures that are individually designed by an architect for a specified user. Such residences typically are constructed from detailed architectural plans and specifications and feature an exceptionally high level of workmanship and exceptionally high-grade materials throughout the interior and exterior of the structure. The design features exceptionally high-quality exterior refinements and ornamentation, and exceptionally high-quality interior refinements. The workmanship, materials, and finishes throughout the dwelling are of exceptionally high quality.

Q2 Dwellings with this quality rating are often custom designed for construction on an individual property owner's site. However, dwellings in this quality grade are also found in high-quality tract developments featuring residences constructed from individual plans or from highly modified or upgraded plans. The design features detailed, high-quality exterior ornamentation, high-quality interior refinements, and detail. The workmanship, materials, and finishes throughout the dwelling are generally of high or very high quality.

Q3 Dwellings with this quality rating are residences of higher quality built from individual or readily available designer plans in above-standard residential tract developments or on an individual property owner's site. The design includes significant exterior ornamentation and interiors that are well finished. The workmanship exceeds acceptable standards and many materials and finishes throughout the dwelling have been upgraded from "stock" standards.

Q4 Dwellings with this quality rating meet or exceed the requirements of applicable building codes. Standard or modified standard building plans are utilized and the design includes adequate fenestration and some exterior ornamentation and interior refinements. Materials, workmanship, finish, and equipment are of stock or builder grade and may feature some upgrades.

Q5 Dwellings with this quality rating feature economy of construction and basic functionality as main considerations. Such dwellings feature a plain design using readily available or basic floor plans featuring minimal fenestration and basic finishes with minimal exterior ornamentation and limited interior detail. These dwellings meet minimum building codes and are constructed with inexpensive, stock materials with limited refinements and upgrades.

Q6 Dwellings with this quality rating are of basic quality and lower cost; some may not be suitable for year-round occupancy. Such dwellings are often built with simple plans or without plans, often utilizing the lowest quality building materials. Such dwellings are often built or expanded by persons who are professionally unskilled or possess only minimal construction skills. Electrical, plumbing, and other mechanical systems and equipment may be minimal or non-existent. Older dwellings may feature one or more substandard or non-conforming additions to the original structure.

Definitions of Not Updated, Updated, and Remodeled

Not Updated

Little or no updating or modernization. This description includes, but is not limited to, new homes.
Residential properties of fifteen years of age or less often reflect an original condition with no updating, if no major components have been replaced or updated. Those over fifteen years of age are also considered not updated if the appliances, fixtures, and finishes are predominantly dated. An area that is 'Not Updated' may still be well maintained and fully functional, and this rating does not necessarily imply deferred maintenance or physical /functional deterioration.

Updated

The area of the home has been modified to meet current market expectations. These modifications are limited in terms of both scope and cost.
An updated area of the home should have an improved look and feel, or functional utility. Changes that constitute updates include refurbishment and/or replacing components to meet existing market expectations. Updates do not include significant alterations to the existing structure.

Remodeled

Significant finish and/or structural changes have been made that increase utility and appeal through complete replacement and/ or expansion.
A remodeled area reflects fundamental changes that include multiple alterations. These alterations may include some or all of the following: replacement of a major component (cabinet(s), bathtub, or bathroom tile), relocation of plumbing/gas fixtures/appliances, significant structural alterations (relocating walls, and/or the addition of square footage). This would include a complete gutting and rebuild.

Explanation of Bathroom Count

The number of full and half baths is reported by separating the two values by a period. The full bath is represented to the left of the period. The half bath count is represented to the right of the period. Three-quarter baths are to be counted as a full bath in all cases. Quarter baths (baths that feature only toilet) are not to be included in the bathroom count.

ADDENDUM

Borrower: Melvin Courtney III		File No.: 26100306
Property Address: 15591 S State Highway 21		Case No.: R26-000045
City: Potosi	State: MO	Zip: 63664
Lender: Paramount Residential Mortgage Group		

SCOPE OF REPORT:

Appraisal Report

The appraisal is based on the information gathered by the appraiser from public records, other identified sources, inspection of the subject property and neighborhood, and selection of comparable sales, listings, and/or rentals within the subject market area. The original source of the comparables is shown in the Data Source section of the market grid along with the source of confirmation, if available. The original source is presented first. The sources and data are considered reliable. When conflicting information was provided, the source deemed most reliable has been used. Data believed to be unreliable was not included in the report nor used as a basis for the value conclusion. The extent of analysis applied to this assignment may be further imparted within the report, the Appraiser's Certification and/or any other Statement of Limiting Conditions such as may be utilized within the Freddie Mac form 439 or Fannie Mae Form 1004b (dated 6/93) or E-R-C form Rev 4 (dated 10/94), when applicable.

The appraiser certifies the appraisal report, as it was sent from the appraisers office. The appraiser cannot be held liable for pages being added or removed from the report, after submission. In the event the submission was requested in the ENV format, the appraiser certifies the appraisal as it was intended to be sent and is kept in the appraisers work file. The ENV converter is known to remove intended pages from the submitted report and strips the report of personalizations like tabs and addendum formatting.

The appraiser certifies and agrees that this appraisal was prepared in accordance with the requirements of Title XI of the Financial Institutions, Reform, Recovery, and Enforcement Act (FIRREA) of 1989, as amended (12 U.S.C. 3331 et seq.), and any applicable implementing regulations in effect at the time the appraiser signs the appraisal certification.

The appraiser is not a home or environmental inspector. The appraiser provides an opinion of value. The appraisal does not guarantee that the property is free of defects or environmental problems. The appraiser performs an inspection of visible and accessible areas only. Mold may be present in areas the appraiser cannot see. There may be problems with wells or septic systems that are not detectable during the property inspection. And, there may be termites or other infestation in areas the appraiser cannot see. A professional home inspection or environmental inspection is recommended.

The Intended User of this appraisal report is the Lender/Client or assignee. The Intended Use is to evaluate the property that is the subject of this appraisal for a mortgage finance transaction, home equity line of credit, or internal asset evaluation, subject to the stated Scope Of Work, purpose of the appraisal, reporting requirements of this appraisal report form, and Definition of Market Value. No additional Intended Users are identified by the appraiser.

APPRAISER INDEPENDENCE

No employee, director, officer, or agent of the Seller, or any other third party acting as joint venture partner, independent contractor, appraisal company, appraisal management company, or partner on behalf of the Seller has influenced or attempted to influence the development, reporting, result, or review of this assignment through coercion, extortion, collusion, compensation, instruction, inducement, intimidation, bribery or in any other manner.

I represent and warrant that, as of the date of this Report, I have had no contact with anyone that would in any way be construed as a violation of the Appraiser Independence Requirements; the only individuals with whom I have had any contact regarding my preparation of this Report have been limited to representatives of lender/client and the designated individual required for entry into the subject property for purposes of inspection.

GENERAL COMMENTS:

The appraiser adhered to Missouri State Licensing Requirements, as it relates to this assignment.

This appraisal is not to be used by any party for insurance purposes.

The subject GLA was obtained by physically measuring the improvements using ANSI Z765-2021 Standards of Measurement. It has become common for the end users to utilize third party sites like "Realist" and "RealQuest", which data mines for information. This information is not reliable. The Assessor offices in this area report only the footprint of the residence and not cantilevers, upper levels, additions, or garage conversions, and cannot be utilized as a source without understanding the process and formulas utilized by the individual Assessor office. The actual assessor websites offer more details to make calculations more reliable. None of the assessor offices have access to the interior of a property, which is a cause of erroneous guesstimates in their data as a source. Any variance in this appraisal from the reported GLA is a result of inaccuracies from the third party sources. In addition, site areas are commonly misreported in all data sources, including the assessor, especially on irregular sites. Surveys, stated areas on deeds, and using the assessor GIS sites to measure the site area, are utilized to determine an accurate site area for subject and comparable properties.

The mapping software does not automatically calculate distances and does not enter it into the bubbles. The distances were manually calculated and entered into the appraisal form.

Site Comments

No adverse easements were noted or considered.

FEMA Map Zone X has minimal flooding and does not require flood insurance.

No determination was made on the efficiency of the water or sewer systems. Public water and sewers are currently unavailable to the subject property. Wells and septic systems are typical for the market.

The subject property is not subject to zoning or subdivision restrictions. There is no governing body overseeing changes to the property. The property can be altered, the improvements altered, and the improvements can be re-built or replaced if damaged, without seeking permission from a governing authority. There is no zoning in the county therefor, this is typical for

C:\Program Files (x86)\ACI32\Reports\26100306.aci

all properties located outside of incorporated areas and has no affect on marketability

Comments on Sales Comparison
The sales comparison analysis is completed by selecting sales that are the most similar available, in all respects, to the subject property. The focus is on physical characteristics of the property and any unusual factors inherent in the subject property, either positive or negative. An attempt is made to find sales that bracket all of these attributes however this is not possible for every item on every property. The sales are arranged on the grid, first by similar characteristics, especially for unusual characteristics. The predominant arrangement is similar to Collateral Underwriter, using weighted analysis and arranging all sales in order by weight, with the exception that sales older than one year cannot be in position 1-3. This can be but, is not limited to the gross and net adjustment factors. The typical time frame for the comparable search is 15 months from the effective date of the appraisal report.

The majority of adjustments were market extracted using group analysis. Some adjustments may have been measured by paired sales, extraction, linear regression, or allocation. Micro adjustments for amenities that cannot be quantified from the market, due to lack of quality data, were not taken. Adjustments for the "Porches and Other Amenities" lines of the grid were not taken. The differences were considered in the final reconciliation. Market adjustable items are adjusted on the bottom line of the grid, if applicable.

A thorough search for comparable sales was made in this market area. Comparable sales that closed within 6 months of the date of this appraisal were significantly different in location, size and quality of construction. In the appraiser's judgement, the comparable sales selected are a better indication of the subjects's value than more recent sales, that are less similar.

Comparable sales over one mile away from the subject property were used because they are the best available in this sparsely populated rural/suburban area. Expanding the search to a radius greater than one mile produced sales still within the same competitive market. These sales are considered the best comparables and most reliable indicators of value to the subject property.

A thorough search was made for comparable sales with gross adjustments less than 25% and net adjustments less than 15% of their sale price. Sales 1 & 5 have higher adjustments and exceed guidelines. After considering locations, dates of sale, physical differences and special conditions, in the appraisers judgement, the sales selected are better indicators of value for the subject property than less similar properties with smaller gross/net adjustments.

Sales with seller concessions were adjusted downward for the estimated market affect from the concessions, based on the actual amount but, not on a dollar per dollar basis.

See the 1004MC addendum for explanation of the competitive market. If an adjustment was made for marketing time. Each sale was adjusted for market change since contracting. The adjustment is based on the rate of change discussed in the neighborhood and/or 1004MC section. Unless otherwise noted, the adjustment was made on a straight line basis.

The site adjustments are based on the regression analysis included in the addendum.

The entire adjustment for age/condition grid lines were made on the Condition line of the grid. No additional adjustment is necessary for the Age line of the grid. Property conditions are estimated from commentary in the listings and review of interior photos included with listings, if any. In this analysis, the condition ratings are related to the cost approach and depreciation rate. Each C rating represents an estimated 5 years difference in the property conditions (effective age). C1=0; C2=5; C3=10; C4=15; C5=20; C6=25. In this report, the rate of depreciation is 1.5% per year or a rate or 8% for the 5 year effective difference.

Subjects number of bedrooms is less than what is typically expected for single family residences in this market. Most homes in the subject market have at least three bedrooms. The adjustment on the upper line of the "above grade room count" lines reflects the value reduction on those comparables with superior bedroom count, as a negative adjustment for functional utility. While this is a functional utility issue, the adjustment is more appropriate on the room count line than the functional utility line of the grid. The lower line is reserved for to adjustment differences in bathroom utility. An effort is made during the appraisal process, to provide as many sales as possible with similar utility, to support the market segment.

The GLA adjustment is based on the regression analysis included in the addendum.

The closed sales indicate the following values for the subject property:

$131,200
$134,500
$137,000
$144,100
$153,000
$156,800

The sales indicate a range of value from $131,000 to $156,000 with an average indication of $142,767 and median at $140,550. Sale 1 has the lowest adjustments of a sale within a year and was given the most weight. In my opinion, the sales comparison is indicating a value of $135,000 for the subject property.

The indicated value is higher than the contract price. The property entered the market and contracted in two days for $7,100 higher than the asking price. This is an indication the property entered the market below it's potential.

Market Conditions Addendum to the Appraisal Report

File No. **26100306**

The purpose of this addendum is to provide the lender/client with a clear and accurate understanding of the market trends and conditions prevalent in the subject neighborhood. This is a required addendum for all appraisal reports with an effective date on or after April 1, 2009.

Property Address **15591 S State Highway 21** City **Potosi** State **MO** Zip Code **63664**

Borrower **Melvin Courtney III**

Instructions: The appraiser must use the information required on this form as the basis for his/her conclusions, and must provide support for those conclusions, regarding housing trends and overall market conditions as reported in the Neighborhood section of the appraisal report form. The appraiser must fill in all the information to the extent it is available and reliable and must provide analysis as indicated below. If any required data is unavailable or is considered unreliable, the appraiser must provide an explanation. It is recognized that not all data sources will be able to provide data for the shaded areas below; if it is available, however, the appraiser must include the data in the analysis. If data sources provide the required information as an average instead of the median, the appraiser should report the available figure and identify it as an average. Sales and listings must be properties that compete with the subject property, determined by applying the criteria that would be used by a prospective buyer of the subject property. The appraiser must explain any anomalies in the data, such as seasonal markets, new construction, foreclosures, etc.

MARKET RESEARCH & ANALYSIS

Inventory Analysis	Prior 7-12 Months	Prior 4-6 Months	Current - 3 Months	Overall Trend		
Total # of Comparable Sales (Settled)	4	0	2	☐ Increasing	☒ Stable	☐ Declining
Absorption Rate (Total Sales/Months)	0.67	0.00	0.67	☐ Increasing	☒ Stable	☐ Declining
Total # of Comparable Active Listings	4	1	1	☒ Declining	☐ Stable	☐ Increasing
Months of Housing Supply (Total Listings/Ab.Rate)	5.97	0.00	1.49	☒ Declining	☐ Stable	☐ Increasing

Median Sale & List Price, DOM, Sale/List %	Prior 7-12 Months	Prior 4-6 Months	Current - 3 Months	Overall Trend		
Median Comparable Sale Price	171,450	0	142,500	☐ Increasing	☐ Stable	☒ Declining
Median Comparable Sales Days on Market	78	0	59	☒ Declining	☐ Stable	☐ Increasing
Median Comparable List Price	171,450	159,900	124,900	☐ Increasing	☐ Stable	☒ Declining
Median Comparable Listings Days on Market	78	118	12	☒ Declining	☐ Stable	☐ Increasing
Median Sale Price as % of List Price	100.00%	0.00%	98.47%	☐ Increasing	☐ Stable	☒ Declining
Seller-(developer, builder, etc.)paid financial assistance prevalent? ☐ Yes ☒ No				☐ Declining	☒ Stable	☐ Increasing

Explain in detail the seller concessions trends for the past 12 months (e.g., seller contributions increased from 3% to 5%, increasing use of buydowns, closing costs, condo fees, options, etc.).

Seller concessions are common in the subject competitive market. When they occur, they are typically less than 5% of the sale price.

Are foreclosure sales (REO sales) a factor in the market? ☐ Yes ☒ No If yes, explain (including the trends in listings and sales of foreclosed properties).

Cite data sources for above information. **The St. Louis Area MLS is the source of the data statistics utilized in this report.**

Summarize the above information as support for your conclusions in the Neighborhood section of the appraisal report form. If you used any additional information, such as an analysis of pending sales and/or expired and withdrawn listings, to formulate your conclusions, provide both an explanation and support for your conclusions.

See Attached Addendum

CONDO / CO-OP PROJECTS

If the subject is a unit in a condominium or cooperative project , complete the following: **Project Name:**

Subject Project Data	Prior 7-12 Months	Prior 4-6 Months	Current - 3 Months	Overall Trend		
Total # of Comparable Sales (Settled)				☐ Increasing	☐ Stable	☐ Declining
Absorption Rate (Total Sales/Months)				☐ Increasing	☐ Stable	☐ Declining
Total # of Active Comparable Listings				☐ Declining	☐ Stable	☐ Increasing
Months of Unit Supply (Total Listings/Ab. Rate)				☐ Declining	☐ Stable	☐ Increasing

Are foreclosure sales (REO sales) a factor in the project? ☐ Yes ☐ No If yes, indicate the number of REO listings and explain the trends in listings and sales of foreclosed properties.

Summarize the above trends and address the impact on the subject unit and project.

Market Analysis Comments

The 1004MC form asks for sales and listing data, from properties that are comparable to subject, which is Competitive Market Data. The neighborhood section of the 1004 Neighborhood Section seeks information on the neighborhood area that is relevant to a typical buyer, and asks for overall statistics on the neighborhood, delineated by the appraiser, which is Neighborhood Data. The neighborhood data considers all ages and styles of housing and gives an indication of the direction of the overall market. A Comparable Market analysis looks at a group of neighborhoods, that a typical buyer would consider, when choosing to buy a property. This analysis gives an indication of the specific competitive market for subject and may not be consistent with the overall neighborhood market. The 1004MC erroneously asks the appraiser to enter the results, of the 1004MC form, into the neighborhood section of the 1004 form and these results are not neighborhood data. The data and conclusions on this form best relate to the Sales Comparison Section of the 1004. This information is the basis for the Listing and Sales activity reported at the top of the Sales Comparison grid. The market change is reconciled between the Competitive Market Analysis and the Neighborhood Market Analysis below.

Notes on the 1004MC: This form was poorly designed and does not give the reader a good impression of what is actually occurring in the market. The form should have either two columns that are semesters, or 4 columns as quarters. As it is, it is comparing a semester to two quarters. The best analysis is to compare the 0-6 month period to the 7-12 month period and not each of the most recent quarters separately. In addition, the absorption rate is not wisely calculated automatically for the Current - 3 month column. This column often reflects skewed supply readings, if used as intended. The most reliable absorption rate for the Current column is the rate for the entire year divided by the current amount of listings. This reflects a true picture of the market. If there are no sales, or very few sales, in the Current column, the months supply is unreasonably skewed. For this reason, the Current column absorption rate may be calculated for the full year of sales activity.

This data set is too small to trend. The entire county of Washington was analysed and it had a beginning median at $272,500 and an ending median at $277,100 for a 1.7% variance. Under 2% is considered stable and no market adjustment was taken in the sales comparison.

APPRAISAL AND REPORT IDENTIFICATION

This report was prepared under the following USPAP reporting option:

☒ **Appraisal Report** A written report prepared under Standards Rule 2-2(a).

☐ **Restricted Appraisal Report** A written report prepared under Standards Rule 2-2(b).

Reasonable Exposure Time

My opinion of a reasonable exposure time for the subject property at the market value stated in this report is: **30-80 days**

Exposure time is the period of time preceding the sale of a property. The exposure time for an appraisal is that period of time estimated to have occurred, prior to the effective date of the appraisal, required to achieve a market sale on the effective date. A reasonable exposure time for the subject property, at the opinion of value indicated was derived using the analysis of the average and median marketing times in the subject neighborhood.

Additional Certifications

☒ I have performed **NO** services, as an appraiser or in any other capacity, regarding the property that is the subject of this report within the three-year period immediately preceding acceptance of this assignment.

☐ I **HAVE** performed services, as an appraiser or in another capacity, regarding the property that is the subject of this report within the three-year period immediately preceding acceptance of this assignment. Those services are described in the comments below.
